AIAA JOURNAL
Volume 36, No. 12, December 1998

1998 *AIAA Journal* Index

How to Use the Index

In the Subject Index, pages 2281–2290, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, pages 2291–2293, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 2294–2304, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1998, that paper also will appear in the Chronological Index. Authors of Comments also are listed in the Author Index. The Book Review Index, page 2304, lists the books reviewed during 1998, the author, publisher, and reviewer, and the volume, issue number, and page on which the review appeared.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Positivity Preservation and Adaptive Solution for the k–ϵ Model of Turbulence **J98-006**
Global Far-Field Computational Boundary Conditions for C- and O-Grid Topologies **J98-023**
Prediction of Viscous Trailing Vortex Structure from Basic Loading Parameters **J98-030**
Study of the Unsteady Flow Features on a Stalled Wing **J98-045**
Skin-Friction Reduction by a Micro-Blowing Technique **J98-070**
Vortex Dynamics of Blade–Blade Interaction **J98-076**
Measurement of Three-Dimensional Crossflow Separation **J98-083**
Vortex Breakdown on Pitching Delta Wing: Control by Intermittent Trailing-Edge Blowing **J98-087**
Fast Newton–Krylov Method for Unstructured Grids **J98-090**
Toward Establishing Credibility in Computational Fluid Dynamics Simulations **J98-101**
Issues in Computational Fluid Dynamics Code Verification and Validation **J98-103**
Certifiable Computational Fluid Dynamics Through Mesh Optimization **J98-105**
Role of Code Validation and Certification in the Design Environment **J98-110**
Prediction of High-Lift Flows Using Turbulent Closure Models **J98-112**
Wave Number Frequency Spectra of a Lifting Wake for Broadband Noise Prediction **J98-130**
Experimental and Numerical Study of Supersonic Film Cooling **J98-135**
Controlling Unsteady Separation on a Cylinder with a Driven Flexible Wall **J98-150**
Improved Aerodynamic Characterization of Regular Three-Dimensional Roughness **J98-165**
Challenges in Understanding the Vortex Dynamics of Helicopter Rotor Wakes **J98-167**
Pressure Oscillations in a Subsonic Cavity at Yaw **J98-168**
Experimental and Computational Investigation of the Knoller–Betz Effect **J98-180**
Quantitative Imaging in Proper Orthogonal Decomposition of Flow Past a Delta Wing **J98-181**
Particle Image Velocimetry via Wavelet Analysis **J98-211**
Luminescent Oil-Film Skin-Friction Meter **J98-212**
Use of Piezoelectric Actuators for Airfoil Separation Control **J98-222**
Measurement and Analysis of the Flowfields Induced by Suction Perforations **J98-228**
Adaptive Grid Sequencing and Interpolation Schemes for Helicopter Rotor Wake Analyses **J98-233**
Unsteady Vortex Structure over Delta-Wing Subject to Transient Along-Core Blowing **J98-241**
Decay of Wake Vortices of Large Aircraft **J98-243**
Artificial Dissipation Schemes for Viscous Airfoil Computations **J98-253**
Mixing of Coaxial Jets with Small Annular Area in a Short Duct **J98-256**
Flowfield Around Ogive/Elliptic-Tip Cylinder at High Angle of Attack **J98-270**
Continuity of Lifting Surface Theory in Subsonic and Supersonic Flow **J98-271**
Unsteady Stall Control Using Dynamically Deforming Airfoils **J98-272**
Development of a Nearly Omnidirectional Velocity Measurement Pressure Probe **J98-280**
Efficient Newton–Krylov Solver for Aerodynamic Computations **J98-297**
Effect of Time-Varying Wake Flow Characteristics Behind Flat Plates **J98-303**
Proportional Control of Asymmetric Forebody Vortices **J98-309**
Direct Measurement of Delta-Wing Vortex Circulation **J98-324**

Aeroelasticity and Aeroservoelasticity

Flutter Prediction Using an Eigenvector Orientation Approach **J98-009**
Neural-Network-Based Controller for Nonlinear Aeroelastic System **J98-035**
Interfacing of Fluid and Structural Models via Innovative Structural Boundary Element Method **J98-040**
Helicopter Rotor System Fault Detection Using Physics-Based Model and Neural Networks **J98-158**
Static and Dynamic Aeroelasticity of Advanced Aircraft Wings Carrying External Stores **J98-166**
Use of Analytical Flow Sensitivities in Static Aeroelasticity **J98-223**
Higher-Order Subiteration-Free Staggered Algorithm for Nonlinear Transient Aeroelastic Problems **J98-263**
Effficient Approach for Analysis of Unsteady Viscous Flows in Turbomachines **J98-299**
Inviscid Rotordynamic Damping Forces Due to Nonaxisymmetric Tip Clearance in Turbines **J98-320**

Configuration Design

Role of Code Validation and Certification in the Design Environment **J98-110**

Flight Mechanics

Computational Fluid Dynamics Validation Issues in Transition Modeling **J98-109**

Flight Operations

Decay of Wake Vortices of Large Aircraft **J98-243**

Fuels and Fuel Systems

Computational and Experimental Study of Liquid Sheet Emanating from Simplex Fuel Nozzle **J98-029**

Manufacturing

Cost Optimization of Stiffened Panels Using VICONOPT **J98-038**

Military Missions

Adaptive Grid Sequencing and Interpolation Schemes for Helicopter Rotor Wake Analyses **J98-233**

Noise

Optimization Method for Educing Variable-Impedance Liner Properties J98-002
Design Approach for Minimizing Sound Power from Vibrating Shell Structures J98-021
Development of an Improved Kirchhoff Method for Jet Aeroacoustics J98-114
Experimental Validation of Lifting Surface Theory for Rotor–Stator Interaction Noise Generation J98-133
Influence of Nozzle Geometry on the Noise of High-Speed Jets J98-203

Powerplant Integration

Validation Issues for Engine–Airframe Integration J98-111

Rotorcraft

Neural-Network-Based Controller for Nonlinear Aeroelastic System J98-035
Helicopter Rotor System Fault Detection Using Physics-Based Model and Neural Networks J98-158
Challenges in Understanding the Vortex Dynamics of Helicopter Rotor Wakes J98-167
Near Field of the Tip Vortex Behind an Oscillating Rectangular Wing J98-183
Limit Cycle Measurements from a Cantilever Beam Attached to a Rotating Body J98-224
Adaptive Grid Sequencing and Interpolation Schemes for Helicopter Rotor Wake Analyses J98-233
Unsteady Stall Control Using Dynamically Deforming Airfoils J98-272

Simulation

Toward Establishing Credibility in Computational Fluid Dynamics Simulations J98-101
Optimized Upwind Dispersion-Relation-Preserving Finite Difference Scheme for Computational Aeroacoustics J98-317

Structural Design (Including Loads)

Layerwise Theory for Dynamic Buckling and Postbuckling of Laminated Composite Cylindrical Shells J98-283
Effective Two-Point Function Approximation for Design Optimization J98-335

Testing, Flight and Ground

Comment on "Tunnel-Induced Gradients and Their Effect on Drag" J96-411
Reply by the Author to M. Mokry J96-411
Comment on "Tunnel-Induced Gradients and Their Effect on Drag" J96-411
Reply by the Author to P. R. Ashill and C. R. Taylor J96-411
Reply by the Author to K. R. Cooper J96-411
Comment on "Tunnel-Induced Gradients and Their Effect on Drag" J96-411
Development of a Global Interferometer Skin-Friction Meter J98-008
Gasdynamical Detectors of Driver Gas Contamination in a High-Enthalpy Shock Tunnel J98-046
Experimental Methodology for Computational Fluid Dynamics Code Validation J98-108
Measurement of Continuous Pressure and Shear Distributions Using Coating and Imaging Techniques J98-132
Interaction of Large Three-Dimensional Eddies and Small Streamwise Vortices J98-195
Development of a Nearly Omnidirectional Velocity Measurement Pressure Probe J98-280
Uncertainty Estimates for Temperature-Sensitive Paint Measurements with Charge-Coupled Device Cameras J98-311
Development of a Coupled Approach for Structural Damage Detection with Incomplete Measurements J98-326

Vibration

Flutter Prediction Using an Eigenvector Orientation Approach J98-009
Virtual Member Method for the Analysis of Frame Structures with Damping Joints J98-129
Updating Structural Dynamic Models with Emphasis on the Damping Properties J98-160
Dynamic Response of Initially Loaded Piezoelectric Plates Composed of Short Fibers J98-217
Pretwisted Nonuniform Beams with Time-Dependent Elastic Boundary Conditions J98-219
Limit Cycle Measurements from a Cantilever Beam Attached to a Rotating Body J98-224
Improved First-Order Approximation of Eigenvalues and Eigenvectors J98-250
Optimization of Piezoceramic Sensor/Actuator Placement for Vibration Control of Laminated Plates J98-266
Vibration of a Mistuned Bladed-Disk Assembly Using Structurally Damped Beams J98-328

Energy

Laser Integration/Systems

Hydrogen Fluoride vs Deuterium Fluoride Space-Based Laser Performance Comparison J98-060

Magnetohydrodynamic Power Generation

Feasibility Study of Magnetohydrodynamics Acceleration of Unseeded and Seeded Airflows J98-088

Rotating Machinery

Accounting for Effects of a System Rotation on the Pressure-Strain Correlation J98-259
Inviscid Rotordynamic Damping Forces Due to Nonaxisymmetric Tip Clearance in Turbines J98-320

Fluid Dynamics

Aeroacoustics

Comment on "Experimental Study of a Normal Shock/Homogeneous Turbulence Interaction" J96-151
Reply by the Authors to H. S. Ribner J96-151
Optimization Method for Educing Variable-Impedance Liner Properties J98-002
Use of Linearized Euler Equations for Supersonic Jet Noise Prediction J98-022
Quadrature-Free Implementation of Discontinuous Galerkin Method for Hyperbolic Equations J98-113
Development of an Improved Kirchhoff Method for Jet Aeroacoustics J98-114
Wave Number Frequency Spectra of a Lifting Wake for Broadband Noise Prediction J98-130
Experimental Validation of Lifting Surface Theory for Rotor–Stator Interaction Noise Generation J98-133
Radiated Noise from Airfoils in Realistic Mean Flows J98-134
Time- and Frequency-Domain Numerical Simulation of Linearized Euler Equations J98-142
Numerical Study of Nozzle Exit Condition Effects on Jet Development J98-145
Pressure Oscillations in a Subsonic Cavity at Yaw J98-168
Experimental Investigation of Unsteady Aerodynamics and Aeroacoustics of a Thin Airfoil J98-169
Analytical Comparison of the Acoustic Analogy and Kirchhoff Formulation for Moving Surfaces J98-201
Broadband Self-Noise from a Ducted Fan J98-202
Influence of Nozzle Geometry on the Noise of High-Speed Jets J98-203
Airfoil Self-Noise Generated in a Cascade J98-231
Numerical Simulation of the Generation of Axisymmetric Mode Jet Screech Tones J98-273
Control of Flow-Induced Noise Behind a Circular Cylinder Using Splitter Plates J98-293
Screech Tone Noise and Mode Switching in Supersonic Swirling Jets J98-294
Optimized Upwind Dispersion-Relation-Preserving Finite Difference Scheme for Computational Aeroacoustics J98-317
Interaction of Sound from Supersonic Jets with Nearby Structures J98-319
Application of Large-Eddy Simulations and Kirchhoff Method to Jet Noise Prediction J98-321

Boundary Layers and Heat Transfer—Laminar

Supersonic Breakaway Separation Past an Adiabatic Wavy Wall J98-085
High-Speed Turbulent Separated Flows: Consistency of Mathematical Models and Flow Physics J98-107

Boundary Layers and Heat Transfer—Turbulent

Evaluation of Explicit Algebraic Reynolds-Stress Models for Separated Supersonic Flows J98-003
Improved Low-Reynolds-Number k–$\tilde{\varepsilon}$ Model Based on Direct Numerical Simulation Data J98-005
Development of a Global Interferometer Skin-Friction Meter J98-008
Two-Equation Turbulence Closure Model for Wall Bounded and Free Shear Flows J98-015
Scaling of Equilibrium Boundary Layers Under Adverse Pressure Gradient Using Turbulence Models J98-047
Predicting S-Duct Flow Using a Composite Algebraic Stress Model J98-048
Efficient Computation of Unsteady Viscous Flows by an Implicit Preconditioned Multigrid Method J98-058
Hybrid Turbulence Model for Unsteady Boundary Layers J98-071
Prediction of the Three-Dimensional Turbulent Boundary Layer over a Swept Bump J98-077
Experimental Study of an Unsteady Separating Boundary Layer J98-084
Modeling of Spatial Wind–Wave Correlations J98-131
Experimental and Numerical Study of Supersonic Film Cooling J98-135

Interacting Vortex and Vortex Layer: How Length Scale Affects Entrainment and Ejection J98-136
Examination of Diffusion Modeling Using Zero-Mean-Shear Turbulence J98-137
Evaluation of Reynolds Stress Closure for Turbulent Boundary Layer in Turbulent Freestream J98-138
Improved Aerodynamic Characterization of Regular Three-Dimensional Roughness J98-165
Turbulent Boundary-Layer Control by Means of Spanwise-Wall Oscillation J98-170
Modeling Near-Wall Effects in Axially Rotating Pipe Flow by Elliptic Relaxation J98-171
Flow Through a Curved Duct Using Nonlinear Two-Equation Turbulence Models J98-182
Interaction of Large Three-Dimensional Eddies and Small Streamwise Vortices J98-195
Morkovin Hypothesis and the Modeling of Wall-Bounded Compressible Turbulent Flows J98-232
Characterization of the Pressure Fluctuations Under a Fully Developed Turbulent Boundary Layer J98-274
Time-Series Analyses of Wall Pressure Fluctuations in Plume-Induced Separated Flowfields J98-275
Further Development of the k–ζ (Enstrophy) Turbulence Closure Model J98-276
Large-Eddy Simulation of a Spatially Evolving Supersonic Turbulent Boundary-Layer Flow J98-296

Boundary-Layer Stability and Transition

Alternative to the e^n Method for Determining Onset of Transition J98-016
Detrimental Effects of Almost Immeasurably Small Freestream Nonuniformities Generated by Wind-Tunnel Screens J98-055
Optimization of Viscoelastic Compliant Walls for Transition Delay J98-097
Computational Fluid Dynamics Validation Issues in Transition Modeling J98-109
Effect of Heating on Quiet Flow in a Mach 4 Ludwieg Tube J98-127
Interacting Vortex and Vortex Layer: How Length Scale Affects Entrainment and Ejection J98-136
Boundary-Layer Receptivity to Transient Convected Disturbances J98-172
Measurement and Analysis of the Flowfields Induced by Suction Perforations J98-228
Uncertainty Estimates for Temperature-Sensitive Paint Measurements with Charge-Coupled Device Cameras J98-311

Computational Fluid Dynamics

Evaluation of Explicit Algebraic Reynolds-Stress Models for Separated Supersonic Flows J98-003
Multigrid Method for the Euler and Navier–Stokes Equations J98-004
Positivity Preservation and Adaptive Solution for the k–ϵ Model of Turbulence J98-006
New Approach to Constrained Shape Optimization Using Genetic Algorithms J98-007
Two-Equation Turbulence Closure Model for Wall Bounded and Free Shear Flows J98-015
Alternative to the e^n Method for Determining Onset of Transition J98-016
Studies of Secondary Flow at Endwall of a Supersonic Compressor Cascade J98-020
Use of Linearized Euler Equations for Supersonic Jet Noise Prediction J98-022
Global Far-Field Computational Boundary Conditions for C- and O-Grid Topologies J98-023
Hybrid Prismatic/Tetrahedral Grid Generation for Viscous Flow Applications J98-024
Computational Analysis of Hypersonic Turbulent Flows over a Projectile with Aerospike J98-025
Turbulence Modeling for Time-Dependent RANS and VLES: A Review J98-026
Preconditioned Multigrid Methods for Two-Dimensional Combustion Calculations at All Speeds J98-027
Application of Newton–Krylov–Schwarz Algorithm to Low-Mach-Number Compressible Combustion J98-042
Subgrid-Scale Turbulent Micromixing: Dynamic Approach J98-049
Efficient Computation of Unsteady Viscous Flows by an Implicit Preconditioned Multigrid Method J98-058
Numerical Viscous Flow Analysis Around a High-Speed Train with Crosswind Effects J98-069
Hybrid Turbulence Model for Unsteady Boundary Layers J98-071
Reordering of Hybrid Unstructured Grids for Lower–Upper Symmetric Gauss–Seidel Computations J98-072
Numerical Simulation of Two-Dimensional Transverse Gas Injection into Supersonic External Flows J98-073
Computation of Flows with Arbitrary Equations of State J98-078
Computation of Particle-Laden Turbulent Gas Flows Using Two Dispersion Models J98-081
Numerical Study of Supersonic Direct Current Plasma Nozzle Flow J98-086
Fast Newton–Krylov Method for Unstructured Grids J98-090
Credible Computational Fluid Dynamics Simulations J98-100
Toward Establishing Credibility in Computational Fluid Dynamics Simulations J98-101
Issues in Computational Fluid Dynamics Code Verification and Validation J98-103
Verification of Codes and Calculations J98-104
Certifiable Computational Fluid Dynamics Through Mesh Optimization J98-105
Aspects of Numerical Uncertainties in Time Marching to Steady-State Numerical Solutions J98-106
Experimental Methodology for Computational Fluid Dynamics Code Validation J98-108
Computational Fluid Dynamics Validation Issues in Transition Modeling J98-109
Role of Code Validation and Certification in the Design Environment J98-110
Validation Issues for Engine–Airframe Integration J98-111
Prediction of High-Lift Flows Using Turbulent Closure Models J98-112
Unsteady Flowfield and Noise Propagation due to Transonic Airfoil–Airfoil Interaction J98-115
Prediction of the High-Reynolds-Number Flow over a Two-Dimensional Bump J98-116
Comparison of Three Navier–Stokes Equation Solvers for Supersonic Open Cavity Simulations J98-124
Parallel Implicit Time-Accurate Navier–Stokes Computations Using Coarse Grid Correction J98-139
Robust and Efficient Cartesian Mesh Generation for Component-Based Geometry J98-140
Efficient Parallel Communication Schemes for Computational Fluid Dynamics Codes J98-141
Time- and Frequency-Domain Numerical Simulation of Linearized Euler Equations J98-142
Numerical Simulation of Three-Dimensional Trailing Vortex Evolution in Stratified Fluid J98-144
Numerical Study of Nozzle Exit Condition Effects on Jet Development J98-145
Reduced-Order Modeling of Unsteady Viscous Flow in a Compressor Cascade J98-152
Modeling Near-Wall Effects in Axially Rotating Pipe Flow by Elliptic Relaxation J98-171
Numerical Simulation of High-Speed Civil Transport Inlet Operability with Angle of Attack J98-178
Flow Through a Curved Duct Using Nonlinear Two-Equation Turbulence Models J98-182
Method for Generating Equilibrium Swirling Inflow Conditions J98-192
K–ϵ and Reynolds Stress Turbulence Model Comparisons for Two-Dimensional Injection Flows J98-204
Essentially Nonoscillatory Euler Solutions on Unstructured Meshes Using Extrapolation J98-205
Solution of the Unsteady Euler Equations Using an Implicit Dual-Time Method J98-206
Use of Analytical Flow Sensitivities in Static Aeroelasticity J98-223
Morkovin Hypothesis and the Modeling of Wall-Bounded Compressible Turbulent Flows J98-232
Data-Parallel Line Relaxation Method for the Navier–Stokes Equations J98-234
Low-Diffusion Flux-Splitting Methods for Flows at All Speeds J98-235
Extension of the k–ω Shear-Stress Transport Turbulence Model for Rough-Wall Flows J98-251
Artificial Dissipation Schemes for Viscous Airfoil Computations J98-253
Generalized Meshing Environment for Computational Mechanics J98-254
Accounting for Effects of a System Rotation on the Pressure-Strain Correlation J98-259
Measurement of Vegetation Sweep-Up at High Shock Overpressure J98-261
Limitations of a Reduced Model for the Simulation of Hydrogen/Air Combustion J98-262
Comment on "Turbulence Modeling for Time-Dependent RANS and VLES: A Review" J98-267
Reply to M. Germano J98-268
Near-Wall k–ϵ Computation of Transonic Turbomachinery Flows with Tip Clearance J98-269
Numerical Simulation of the Generation of Axisymmetric Mode Jet Screech Tones J98-273
Further Development of the k–ζ (Enstrophy) Turbulence Closure Model J98-276
Prediction Method of Unsteady Combustion Around Hypersonic Projectile in Stoichiometric Hydrogen–Air J98-277
Nonclassical Dense Gas Flows for Simple Geometrics J98-278
Quantitative Evaluation of Flow Computations by Rainbow Schlieren Deflectometry J98-292

Tetrahedral Unstructured Navier–Stokes Method for Turbulent Flows J98-295
Large-Eddy Simulation of a Spatially Evolving Supersonic Turbulent Boundary-Layer Flow J98-296
Efficient Newton–Krylov Solver for Aerodynamic Computations J98-297
Improved Treatment of External Boundary Conditions for Three-Dimensional Flow Computations J98-298
Effficient Approach for Analysis of Unsteady Viscous Flows in Turbomachines J98-299
Parallel Processing Scheme for the Navier–Stokes Equations, Part 1: Scheme Development J98-300
Parallel Processing Scheme for the Navier–Stokes Equations, Part 2: Parallel Implementation J98-301
Numerical Analysis of Shock Wave Reflection Transition in Steady Flows J98-308
Interaction of Sound from Supersonic Jets with Nearby Structures J98-319
Application of Large-Eddy Simulations and Kirchhoff Method to Jet Noise Prediction J98-321
Computational Fluid Dynamics/Computational Structural Dynamics Interaction Methodology for Aircraft Wings J98-322
Adaptive Finite Element Solution of Compressible Turbulent Flows J98-323

Hydrodynamics

Free- and Near-Free-Surface Swirling Turbulent Jets J98-052
Flow Transition in Swirled Liquid Sheets J98-061
Geometrical Effects on the Near-Field Flow Structure of Coaxial Jets J98-125
Method for Correlating Discharge Coefficients of Film-Cooling Holes J98-143
Modeling the Flow of Water on Aircraft in Icing Conditions J98-148
Experimental and Computational Investigation of the Knoller–Betz Effect J98-180
Particle Image Velocimetry via Wavelet Analysis J98-211
Laser Doppler Velocimetry Velocity Bias in Turbulent Open Channel Flow J98-226
Accounting for Effects of a System Rotation on the Pressure-Strain Correlation J98-259
Axisymmetric Breakdown of a Q-Vortex in a Pipe J98-279

Hypersonic Flow

Computational Analysis of Hypersonic Turbulent Flows over a Projectile with Aerospike J98-025
Application of Method of Characteristics to Underexpanded, Freejet Flows with Vibrational Nonequilibrium J98-028
Force Measurements in Hypersonic Impulse Facilities J98-050
Multidimensional, Magnetohydrodynamic Simulation of Solar-Generated Disturbances: Space Weather Forecasting of Geomagnetic Storms J98-053
Flow Characterization in the ONERA F4 High-Enthalpy Wind Tunnel J98-079
Coupled Vibration-Dissociation-Exchange Reactions Model for Hypersonic Airflow Computations J98-080
Emission and Holographic Interferometry Measurements in a Superorbital Expansion Tube J98-153
Velocity Measurement in Hypersonic Flows Using Electron-Beam-Assisted Glow Discharge J98-155
Data-Parallel Line Relaxation Method for the Navier–Stokes Equations J98-234

Inlet, Nozzle, Diffuser, and Channel Flows

Multigrid Method for the Euler and Navier–Stokes Equations J98-004
Improved Low-Reynolds-Number k–$\tilde{\epsilon}$ Model Based on Direct Numerical Simulation Data J98-005
New Approach to Constrained Shape Optimization Using Genetic Algorithms J98-007
Near-Field Velocity Measurements of Confined Square Jet with Primary and Secondary Tabs J98-041
Predicting S-Duct Flow Using a Composite Algebraic Stress Model J98-048
Validation Issues for Engine–Airframe Integration J98-111
Viscous and Inviscid Vortex Generation During Startup of Rocket Nozzles J98-117
Active Control of Twin-Pulse Combusters J98-119
Geometrical Effects on the Near-Field Flow Structure of Coaxial Jets J98-125
Modeling Near-Wall Effects in Axially Rotating Pipe Flow by Elliptic Relaxation J98-171
Passive Control of Supersonic Rectangular Jets via Nozzle Trailing-Edge Modifications J98-179
Method for Generating Equilibrium Swirling Inflow Conditions J98-192
Laser Doppler Velocimetry Velocity Bias in Turbulent Open Channel Flow J98-226
Nozzle Flow Separation J98-236
Modeling Flow and Heat Transfer in Vortex Burners J98-242
Mixing Enhancement in High-Speed Turbulent Shear Layers Using Excited Coherent Modes J98-302

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Positivity Preservation and Adaptive Solution for the k–ϵ Model of Turbulence J98-006
Quantification of Mixing and Mixing Rate from Experimental Observations J98-019
Application of Method of Characteristics to Underexpanded, Freejet Flows with Vibrational Nonequilibrium J98-028
Prediction of Viscous Trailing Vortex Structure from Basic Loading Parameters J98-030
Free- and Near-Free-Surface Swirling Turbulent Jets J98-052
Numerical Simulation of Two-Dimensional Transverse Gas Injection into Supersonic External Flows J98-073
Mach Reflection Wave Configuration in Two-Dimensional Supersonic Jets of Overexpanded Nozzles J98-074
Turbulence Structure in the Spiral Wake Shed by a Lifting Wing J98-098
Development of an Improved Kirchhoff Method for Jet Aeroacoustics J98-114
Viscous and Inviscid Vortex Generation During Startup of Rocket Nozzles J98-117
Geometrical Effects on the Near-Field Flow Structure of Coaxial Jets J98-125
Origin of Streamwise Vortices in Supersonic Jets J98-126
Numerical Study of Nozzle Exit Condition Effects on Jet Development J98-145
Some Specific Characteristics of Turbulence in the Reactive Wakes of Bluff Bodies J98-146
Exponentially Accelerating Jet in Crossflow J98-147
Velocity and Density Measurements in Supersonic High-Temperature Exhaust Plumes J98-177
Prediction of Shock Angles Caused by Sharp Delta Wings with Attack Angle J98-193
Observations of Supersonic Flat Plate Wake Transition J98-194
Structure and Soot Properties of Nonbuoyant Ethylene/Air Laminar Jet Diffusion Flames J98-198
Influence of Nozzle Geometry on the Noise of High-Speed Jets J98-203
Simulations of Planar Flapping Jets in Confined Channels J98-207
Application of Parabolized Stability Equations to the Prediction of Jet Instabilities J98-225
Nozzle Flow Separation J98-236
Immediate and Near Wake Flow Patterns Behind Slotted Disks J98-237
Scaling the Near-Field Centerline Mixing Behavior of Axisymmetric Turbulent Jets J98-238
Forcing of Compressible Mixing Layers Using Laser Excitation J98-252
Jets in Ground Effect with a Crossflow J98-255
Mixing of Coaxial Jets with Small Annular Area in a Short Duct J98-256
Numerical Simulation of the Generation of Axisymmetric Mode Jet Screech Tones J98-273
Duty-Cycle Effects on Penetration of Fully Modulated, Turbulent Jets in Crossflow J98-289
Control of Flow-Induced Noise Behind a Circular Cylinder Using Splitter Plates J98-293
Screech Tone Noise and Mode Switching in Supersonic Swirling Jets J98-294
Mixing Enhancement in High-Speed Turbulent Shear Layers Using Excited Coherent Modes J98-302
Simulation of Dynamic Methane Jet Diffusion Flames Using Finite Rate Chemistry Models J98-304
Interaction of Sound from Supersonic Jets with Nearby Structures J98-319

Multiphase Flows

Eulerian Model for Mean Turbulent Diffusion of Particles in Free Shear Layers J98-001
Computational and Experimental Study of Liquid Sheet Emanating from Simplex Fuel Nozzle J98-029
Computation of Particle-Laden Turbulent Gas Flows Using Two Dispersion Models J98-081
Measurement of Vegetation Sweep-Up at High Shock Overpressure J98-261

Plasmadynamics and MHD

Multidimensional, Magnetohydrodynamic Simulation of Solar-Generated Disturbances: Space Weather Forecasting of Geomagnetic Storms J98-053
Numerical Study of Supersonic Direct Current Plasma Nozzle Flow J98-086
Feasibility Study of Magnetohydrodynamics Acceleration of Unseeded and Seeded Airflows J98-088

Rarefied Flows

Velocity Measurement in Hypersonic Flows Using Electron-Beam-Assisted Glow Discharge **J98-155**

Reacting Flows and Combustion

Preconditioned Multigrid Methods for Two-Dimensional Combustion Calculations at All Speeds **J98-027**
Application of Newton–Krylov–Schwarz Algorithm to Low-Mach-Number Compressible Combustion **J98-042**
Subgrid-Scale Turbulent Micromixing: Dynamic Approach **J98-049**
Computation of Flows with Arbitrary Equations of State **J98-078**
Some Specific Characteristics of Turbulence in the Reactive Wakes of Bluff Bodies **J98-146**
Premixed Turbulent Flame/Flow Interaction: Simultaneous Measurements of Velocity and Flamelet Position **J98-173**
Tomographic Analysis of Unsteady, Reacting Flows: Numerical Investigation **J98-184**
Overview of the NASA Microgravity Combustion Program **J98-197**
Structure and Soot Properties of Nonbuoyant Ethylene/Air Laminar Jet Diffusion Flames **J98-198**
Experimental Study of Flame Balls in Space: Preliminary Results from the STS-83 **J98-199**
Suppression of Flame Wrinkling by Buoyancy: The Baroclinic Stabilization Mechanism **J98-208**
Transport Enhancement in Acoustically Excited Cavity Flows, Part 1: Nonreactive Flow Diagnostics **J98-229**
Transport Enhancement in Acoustically Excited Cavity Flows, Part 2: Reactive Flow Diagnostics **J98-230**
Self-Consistent Modeling of Volume and Surface Processes in Air Plasma **J98-239**
Modeling Flow and Heat Transfer in Vortex Burners **J98-242**
Concentration and Temperature Profiles of Diffusion Flames in Droptower Experiments **J98-257**
Limitations of a Reduced Model for the Simulation of Hydrogen/Air Combustion **J98-262**
Diffusion Flame Stabilized on a Porous Plate in a Parallel Airstream **J98-291**
Quantitative Evaluation of Flow Computations by Rainbow Schlieren Deflectometry **J98-292**
Simulation of Dynamic Methane Jet Diffusion Flames Using Finite Rate Chemistry Models **J98-304**
Computational Investigation of Shock-Enhanced Mixing: Application to Circular Cross Section Combustor **J98-305**

Separated Flows

Comment on "Tunnel-Induced Gradients and Their Effect on Drag" **J96-411**
Reply by the Author to M. Mokry **J96-411**
Comment on "Tunnel-Induced Gradients and Their Effect on Drag" **J96-411**
Reply by the Author to P. R. Ashill and C. R. Taylor **J96-411**

Chronological Index

J96-353 Improvement in Model Reduction Schemes Using the System Equivalent Reduction Expansion Process. Michael Papadopoulos, and Ephrahim Garcia, *Vanderbilt University* (**34**, 10, p. 2217) Technical Note

Technical Comment by Zu-Qing Qu and Zhi-Fang Fu, *Shanghai Jiao Tong University, PRC* (**36**, 10, p. 1941)

Reply (**36**, 10, p. 1941)

J96-151 Experimental Study of a Normal Shock/Homogeneous Turbulence Interaction. S. Barre, D. Alem, and J. P. Bonnet, *Université de Poitiers, France* (**34**, 5, p. 968) Article based on AIAA Paper 95-0759

Technical Comment by H. S. Ribner, *University of Toronto, Canada* (**36**, 3, p. 494)

Reply (**36**, 3, p. 495)

J96-411 Tunnel-Induced Gradients and Their Effect on Drag. J. E. Hackett, *Lockheed Martin Aeronautical Systems Company* (**34**, 12, p. 2575) Article based on AIAA Paper 96-0562

Technical Comment by P. R. Ashill and C. R. Taylor, *Defence Evaluation and Research Agency, England, UK* (**36**, 2, p. 298)

Reply (**36**, 2, p. 299)

Technical Comment by Kevin R. Cooper, *National Research Council, Canada* (**36**, 2, p. 299)

Reply (**36**, 2, p. 300)

Technical Comment by M. Mokry, *National Research Council, Canada* (**36**, 2, p. 301)

Reply (**36**, 2, p. 302)

J98-001 Eulerian Model for Mean Turbulent Diffusion of Particles in Free Shear Layers. Eric Loth, *University of Illinois at Urbana–Champaign* (**36**, 1, p. 12) Article

J98-002 Optimization Method for Educing Variable-Impedance Liner Properties. Willie R. Watson, Sharon E. Tanner, and Tony L. Parrott, *NASA Langley Research Center* (**36**, 1, p. 18) Article based on AIAA Paper 97-1704

J98-003 Evaluation of Explicit Algebraic Reynolds-Stress Models for Separated Supersonic Flows. Donald P. Rizzetta, *U.S. Air Force Research Laboratory* (**36**, 1, p. 24) Article based on AIAA Paper 97-2125

J98-004 Multigrid Method for the Euler and Navier–Stokes Equations. A. O. Demuren and S. O. Ibraheem, *Old Dominion University* (**36**, 1, p. 31) Article based on AIAA Paper 96-6299

J98-005 Improved Low-Reynolds-Number k–$\tilde{\varepsilon}$ Model Based on Direct Numerical Simulation Data. C. B. Hwang and C. A. Lin, *National Tsing Hua University, Taiwan, ROC* (**36**, 1, p. 38) Article based on AIAA Paper 97-0720

J98-006 Positivity Preservation and Adaptive Solution for the k–ϵ Model of Turbulence. Florin Ilinca, *National Research Council, Canada*; and Dominique Pelletier, *École Polytechnique de Montréal, Canada* (**36**, 1, p. 44) Article

J98-007 New Approach to Constrained Shape Optimization Using Genetic Algorithms. M. C. Sharatchandra, Mihir Sen, and Mohamed Gad-el-Hak, *University of Notre Dame* (**36**, 1, p. 51) Article

J98-008 Development of a Global Interferometer Skin-Friction Meter. T. J. Garrison and M. Ackman, *Louisiana State University* (**36**, 1, p. 62) Article

J98-009 Flutter Prediction Using an Eigenvector Orientation Approach. Daré Afolabi and Ramana M. V. Pidaparti, *Purdue University at Indianapolis*; and Henry T. Y. Yang, *University of California, Santa Barbara* (**36**, 1, p. 69) Article

J98-010 Progressive Failure Analysis of Pin-Loaded Laminated Composites Using Penalty Finite Element Method. Seung Jo Kim and Joon Seok Hwang, *Seoul National University, Korea*; and Jin Hee Kim, *Korea Aerospace Research Institute* (**36**, 1, p. 75) Article

J98-011 Effect of Ply Thickness on Fracture of Notched Composite Laminates. Rajesh S. Vaidya, J. C. Klug, and C. T. Sun, *Purdue University* (**36**, 1, p. 81) Article

J98-012 Determination of Buckling Speed for Rotating Orthotropic Disk Restrained at Outer Edge. Naki Tutuncu and Ali Durdu, *Çukurova University, Turkey* (**36**, 1, p. 89) Article

J98-013 Direct Coupled Load Verification of Modified Structural Component. Y. Yasui, *Nippon Telegraph and Telephone Corporation, Japan* (**36**, 1, p. 94) Article

J98-014 Three-Dimensional Piezoelectric Boundary Element Method. L. R. Hill and T. N. Farris, *Purdue University* (**36**, 1, p. 102) Article

J98-015 Two-Equation Turbulence Closure Model for Wall Bounded and Free Shear Flows. David F. Robinson and H. A. Hassan, *North Carolina State University* (**36**, 1, p. 109) Technical Note based on AIAA Paper 96-2057

J98-016 Alternative to the e^n Method for Determining Onset of Transition. E. W. Warren and H. A. Hassan, *North Carolina State University* (**36**, 1, p. 111) Technical Note

J98-017 Shock Pattern of a Triple-Shock Turbulent Interaction. Datta Gaitonde and J. S. Shang, *U.S. Air Force Wright Laboratory* (**36**, 1, p. 113) Technical Note

J98-018 Fatigue Analysis of Cracked Aluminum Plates Repaired with Bonded Composite Patches. T. Y. Kam, Y. C. Tsai, K. H. Chu, and J. H. Wu, *National Chiao Tung University, Taiwan, ROC* (**36**, 1, p. 115) Technical Note

J98-019 Quantification of Mixing and Mixing Rate from Experimental Observations. R. Everson, D. Manin, and L. Sirovich, *Rockefeller University*; and M. Winter, *United Technologies Research Center* (**36**, 2, p. 121) Article

J98-020 Studies of Secondary Flow at Endwall of a Supersonic Compressor Cascade. Denver J. Osborne Jr. and Wing F. Ng, *Virginia Polytechnic Institute and State University*; and Daniel L. Tweedt, *NASA Lewis Research Center* (**36**, 2, p. 128) Article based on AIAA Paper 96-2558

J98-021 Design Approach for Minimizing Sound Power from Vibrating Shell Structures. E. W. Constans, A. D. Belegundu, and G. H. Koopmann, *Pennsylvania State University* (**36**, 2, p. 134) Article based on AIAA Paper 96-4111 CP9611

J98-022 Use of Linearized Euler Equations for Supersonic Jet Noise Prediction. R. R. Mankbadi, R. Hixon, S.-H. Shih, and L. A. Povinelli, *NASA Lewis Research Center* (**36**, 2, p. 140) Article based on AIAA Paper 95-0505

J98-023 Global Far-Field Computational Boundary Conditions for C- and O-Grid Topologies. A. Verhoff, *McDonnell Douglas Corporation* (**36**, 2, p. 148) Article

J98-024 Hybrid Prismatic/Tetrahedral Grid Generation for Viscous Flow Applications. Dmitri Sharov and Kazuhiro Nakahashi, *Tohoku University, Japan* (**36**, 2, p. 157) Article based on AIAA Paper 96-2000

J98-025 Computational Analysis of Hypersonic Turbulent Flows over a Projectile with Aerospike. Venkata S. Krishnamurty and Wei Shyy, *University of Florida* (**36**, 2, p. 163) Article

J98-026 Turbulence Modeling for Time-Dependent RANS and VLES: A Review. Charles G. Speziale, *Boston University* (**36**, 2, p. 173) Article based on AIAA Paper 97-2051

Technical Comment by M. Germano, *Turin Polytechnic*

Institute, Italy (**36**, 9, p. 1766)
Reply (**36**, 9, p. 1767)

J98-027 Preconditioned Multigrid Methods for Two-Dimensional Combustion Calculations at All Speeds. Jack R. Edwards and Christopher J. Roy, *North Carolina State University* (**36**, 2, p. 185) Article based on AIAA Paper 96-3129

J98-028 Application of Method of Characteristics to Underexpanded, Freejet Flows with Vibrational Nonequilibrium. Jennifer L. Palmer and Ronald K. Hanson, *Stanford University* (**36**, 2, p. 193) Article

J98-029 Computational and Experimental Study of Liquid Sheet Emanating from Simplex Fuel Nozzle. S. M. Jeng and M. A. Jog, *University of Cincinnati*; and M. A. Benjamin, *Parker Hannifin Corporation* (**36**, 2, p. 201) Article based on AIAA Paper 97-0796

J98-030 Prediction of Viscous Trailing Vortex Structure from Basic Loading Parameters. John A. Rule and Donald B. Bliss, *Duke University* (**36**, 2, p. 208) Article based on AIAA Paper 96-2495 CP965

J98-031 Physical Programming for Computational Control. Achille Messac and Bruce H. Wilson, *Northeastern University* (**36**, 2, p. 219) Article

J98-032 Electrode Pattern Design of Piezoelectric Sensors and Actuators Using Genetic Algorithms. Jung-Kyu Ryou, Keun-Young Park, and Seung-Jo Kim, *Seoul National University, Korea* (**36**, 2, p. 227) Article based on AIAA Paper 97-1348 CP973

J98-033 Dual-Pump Coherent Anti-Stokes Raman Scattering for Simultaneous Pressure/Temperature Measurement. Robert E. Foglesong, Stephen M. Green, Robert P. Lucht, and J. Craig Dutton, *University of Illinois at Urbana–Champaign* (**36**, 2, p. 234) Article

J98-034 Improved Time-Dependent Flowfield Solution for Solid Rocket Motors. J. Majdalani, *Marquette University*; and W. K. Van Moorhem, *University of Utah* (**36**, 2, p. 241) Article based on AIAA Paper 97-2717

J98-035 Neural-Network-Based Controller for Nonlinear Aeroelastic System. C.-S. Ku and P. Hajela, *Rensselaer Polytechnic Institute* (**36**, 2, p. 249) Article based on AIAA Paper 97-1182 CP973

J98-036 Sensor Placement Methodologies for Dynamic Testing. Michael Papadopoulos and Ephrahim Garcia, *Vanderbilt University* (**36**, 2, p. 256) Article

J98-037 Buckling Load Reduction for Stiffened Panels Due to Cutouts in Ribs. Andrew Watson, Fred W. Williams, and David Kennedy, *University of Wales, UK* (**36**, 2, p. 264) Article

J98-038 Cost Optimization of Stiffened Panels Using VICONOPT. Dyfan A. Edwards, Fred W. Williams, and David Kennedy, *University of Wales, UK* (**36**, 2, p. 267) Article

J98-039 Updated Lagrangian Formulation of a Flat Triangular Element for Thin Laminated Shells. P. Mohan and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University* (**36**, 2, p. 273) Article based on AIAA Paper 97-1233 CP973

J98-040 Interfacing of Fluid and Structural Models via Innovative Structural Boundary Element Method. P. C. Chen and I. Jadic, *ZONA Technology, Inc.* (**36**, 2, p. 282) Article based on AIAA Paper 97-1088 CP973

J98-041 Near-Field Velocity Measurements of Confined Square Jet with Primary and Secondary Tabs. Simon C. M. Yu and Y. X. Hou, *Nanyang Technological University, Singapore* (**36**, 2, p. 288) Technical Note

J98-042 Application of Newton–Krylov–Schwarz Algorithm to Low-Mach-Number Compressible Combustion. P. R. McHugh, *Semitool, Inc.*; D. A. Knoll, *Los Alamos National Laboratory*; and D. E. Keyes, *Old Dominion University* (**36**, 2, p. 290) Technical Note based on AIAA Paper 96-0911

J98-043 Improved Optimality Criterion Algorithm for Optimal Structural Design. Jianping Chen, Weiming Ni, and Wenliang Wang, *Fudan University, PRC* (**36**, 2, p. 292) Technical Note

J98-044 Extension of the Rydberg–Klein–Reese Potential for the Nitrogen Molecule. C. Frederick Hansen, *University of Oregon* (**36**, 2, p. 295) Technical Note

J98-045 Study of the Unsteady Flow Features on a Stalled Wing. Steven A. Yon and Joseph Katz, *San Diego State University* (**36**, 3, p. 305) Article based on AIAA Paper 97-1927

J98-046 Gasdynamical Detectors of Driver Gas Contamination in a High-Enthalpy Shock Tunnel. Norikazu Sudani, *National Aerospace Laboratory, Japan*; and Hans G. Hornung, *California Institute of Technology* (**36**, 3, p. 313) Article based on AIAA Paper 97-0561

J98-047 Scaling of Equilibrium Boundary Layers Under Adverse Pressure Gradient Using Turbulence Models. Ruud A. W. M. Henkes, *Delft University of Technology, The Netherlands* (**36**, 3, p. 320) Article

J98-048 Predicting S-Duct Flow Using a Composite Algebraic Stress Model. T. Jongen and G. Mompean, *Swiss Federal Institute of Technology*; and T. B. Gatski, *NASA Langley Research Center* (**36**, 3, p. 327) Article

J98-049 Subgrid-Scale Turbulent Micromixing: Dynamic Approach. J. Réveillon and L. Vervisch, *Institut National des Sciences Appliquées de Rouen, France* (**36**, 3, p. 336) Article based on AIAA Paper 97-0367

J98-050 Force Measurements in Hypersonic Impulse Facilities. V. Störkmann, H. Olivier, and H. Grönig, *Rheinisch–Westfälische Technische Hochschule, Germany* (**36**, 3, p. 342) Article

J98-051 Confined Coaxial Nozzle Flow with Central Lobed Mixer at Different Velocity Ratios. S. C. M. Yu and X. G. Xu, *Nanyang Technological University, Singapore* (**36**, 3, p. 349) Article based on AIAA Paper 97-1811

J98-052 Free- and Near-Free-Surface Swirling Turbulent Jets. M. S. Feyedelem and T. Sarpkaya, *U.S. Naval Postgraduate School* (**36**, 3, p. 359) Article based on AIAA Paper 97-0438

J98-053 Multidimensional, Magnetohydrodynamic Simulation of Solar-Generated Disturbances: Space Weather Forecasting of Geomagnetic Storms. Murray Dryer, *National Oceanic and Atmospheric Administration* (**36**, 3, p. 365) Article based on AIAA Paper 97-2419

J98-054 Experimental Study of Causes of Unsteadiness of Shock-Induced Turbulent Separation. Ö. H. Ünalmis and D. S. Dolling, *University of Texas at Austin* (**36**, 3, p. 371) Article

J98-055 Detrimental Effects of Almost Immeasurably Small Freestream Nonuniformities Generated by Wind-Tunnel Screens. Jonathan H. Watmuff, *MCAT Inc.* (**36**, 3, p. 379) Article based on AIAA Paper 97-0228

J98-056 Competing Mechanisms of Compressible Dynamic Stall. M. S. Chandrasekhara, *U.S. Naval Postgraduate School*; M. C. Wilder, *MCAT Inc.*; and L. W. Carr, *NASA Ames Research Center* (**36**, 3, p. 387) Article based on AIAA Paper 96-1953

J98-057 Study of Passive Control in a Transonic Shock Wave/Boundary-Layer Interaction. Reynald Bur, Bernard Corbel, and Jean Délery, *ONERA, France* (**36**, 3, p. 394) Article based on AIAA Paper 97-0217

J98-058 Efficient Computation of Unsteady Viscous Flows by an Implicit Preconditioned Multigrid Method. Niles A. Pierce, *Oxford University, England, UK*; and Juan J. Alonso, *Princeton University* (**36**, 3, p. 401) Article based on AIAA Paper 97-0444

J98-059 Model for Rotor Tip Vortex–Airframe Interaction

Part 3: Viscous Flow on Airframe. H. Affes, *Ford Motor Company*; Z. Xiao and A. T. Conlisk, *Ohio State University*; and J. M. Kim and N. M. Komerath, *Georgia Institute of Technology* (**36**, 3, p. 409) Article

J98-060 Hydrogen Fluoride vs Deuterium Fluoride Space-Based Laser Performance Comparison. Robert Acebal, *Science Applications International Corporation* (**36**, 3, p. 416) Article

J98-061 Flow Transition in Swirled Liquid Sheets. K. Ramamurthi and T. J. Tharakan, *Liquid Proulsion Systems Centre, India* (**36**, 3, p. 420) Article based on AIAA Paper 97-1779

J98-062 Combined Method for Calculating Eigenvector Derivatives with Repeated Eigenvalues. Su Zheng, Weiming Ni, and Wenliang Wang, *Fudan University, PRC* (**36**, 3, p. 428) Article

J98-063 Flight Results from the Middeck Active Control Experiment (MACE). David W. Miller, Jonathan P. How, Mark E. Campbell, Simon Grocott, Ketao Liu, Roger M. Glaese, and Timothy Tuttle, *Massachusetts Insitute of Technology* (**36**, 3, p. 432) Article

J98-064 Scaling Effects in Sublaminate-Level Scaled Composite Laminates. David P. Johnson, *Mississippi State University*; John Morton, *Royal Aerospace Establishment, England, UK*; Sotiris Kellas, *Lockheed Martin Engineering and Sciences Company, Inc.*; and Karen Jackson, *U.S. Army Research Laboratory* (**36**, 3, p. 441) Article

J98-065 Failure of Adhesive-Bonded Composite Single Lap Joints with Embedded Cracks. L. Tong, *University of Sydney, Australia* (**36**, 3, p. 448) Article

J98-066 Predictions of Widespread Fatigue Damage Thresholds in Aging Aircraft. L. Wang, *University of California, Los Angeles*; W. T. Chow, H. Kawai, and S. N. Atluri, *Georgia Institute of Technology* (**36**, 3, p. 457) Article

J98-067 Wavelet-Based Model for Stochastic Analysis of Beam Structures. Hong Mei and Om P. Agrawal, *Southern Illinois University*; and Shantaram S. Pai, *NASA Lewis Research Center* (**36**, 3, p. 465) Article

J98-068 Design of Adaptive Structures for Improved Load Capacity. Jan Holnicki-Szulc, *Polish Academy of Sciences*; Andrzej Maćkiewicz, *Technical University of Poznan, Poland*; and Przemysław Kołakowski, *Polish Academy of Sciences* (**36**, 3, p. 471) Article based on AIAA Paper 96-4076 CP9611

J98-069 Numerical Viscous Flow Analysis Around a High-Speed Train with Crosswind Effects. Warn-Gyu Park and Young-Rae Jung, *Pusan National University, Korea*; and Seong-Do Ha, *Korea Institute of Machinery and Materials* (**36**, 3, p. 477) Technical Note

J98-070 Skin-Friction Reduction by a Micro-Blowing Technique. Danny P. Hwang, *NASA Lewis Research Center* (**36**, 3, p. 480) Technical Note

J98-071 Hybrid Turbulence Model for Unsteady Boundary Layers. David Greenblatt, *Tel Aviv University, Israel* (**36**, 3, p. 481) Engineering Note

J98-072 Reordering of Hybrid Unstructured Grids for Lower–Upper Symmetric Gauss–Seidel Computations. Dmitri Sharov and Kazuhiro Nakahashi, *Tohoku University, Japan* (**36**, 3, p. 484) Technical Note based on AIAA Paper 97-2102

J98-073 Numerical Simulation of Two-Dimensional Transverse Gas Injection into Supersonic External Flows. R. Dhinagaran and T. K. Bose, *Indian Institute of Technology* (**36**, 3, p. 486) Technical Note

J98-074 Mach Reflection Wave Configuration in Two-Dimensional Supersonic Jets of Overexpanded Nozzles. H. Li and G. Ben-Dor, *Ben-Gurion University of the Negev, Israel* (**36**, 3, p. 488) Technical Note

J98-075 Direct Updating of Damping and Stiffness Matrices. M. I. Friswell, *University of Wales, UK*; and D. J. Inman and D. F. Pilkey, *Virginia Polytechnic Institute and State University* (**36**, 3, p. 491) Technical Note

J98-076 Vortex Dynamics of Blade–Blade Interaction. Z. X. Yao and D. D. Liu, *Arizona State University* (**36**, 4, p. 497) Article based on AIAA Paper 94-0737

J98-077 Prediction of the Three-Dimensional Turbulent Boundary Layer over a Swept Bump. Xiaohua Wu and Kyle D. Squires, *Arizona State University* (**36**, 4, p. 505) Article

J98-078 Computation of Flows with Arbitrary Equations of State. Charles L. Merkle, *Pennsylvania State University*; Jennifer Y. Sullivan, *GMI Engineering and Management Institute*; and Philip E. O. Buelow and Sankaran Venkateswaran, *Pennsylvania State University* (**36**, 4, p. 515) Article based on AIAA Paper 96-0680

J98-079 Flow Characterization in the ONERA F4 High-Enthalpy Wind Tunnel. Philippe Sagnier and Jean-Luc Vérant, *ONERA, France* (**36**, 4, p. 522) Article based on AIAA Paper 96-2239

J98-080 Coupled Vibration-Dissociation-Exchange Reactions Model for Hypersonic Airflow Computations. S. Séror, M.-C. Druguet, E. Schall, and D. E. Zeitoun, *Université de Provence, France* (**36**, 4, p. 532) Article based on AIAA Paper 97-2556

J98-081 Computation of Particle-Laden Turbulent Gas Flows Using Two Dispersion Models. X.-Q. Chen and J. C. F. Pereira, *Instituto Superior Técnico, Portugal* (**36**, 4, p. 539) Article

J98-082 Effects of Periodic Excitation on Turbulent Flow Separation from a Flap. B. Nishri and I. Wygnanski, *Tel-Aviv University, Israel* (**36**, 4, p. 547) Article

J98-083 Measurement of Three-Dimensional Crossflow Separation. Todd G. Wetzel, Roger L. Simpson, and Christopher J. Chesnakas, *Virginia Polytechnic Institute and State University* (**36**, 4, p. 557) Article

J98-084 Experimental Study of an Unsteady Separating Boundary Layer. E. A. Lurie, D. P. Keenan, and J. E. Kerwin, *Massachusetts Institute of Technology* (**36**, 4, p. 565) Article

J98-085 Supersonic Breakaway Separation Past an Adiabatic Wavy Wall. Alric P. Rothmayer, *Iowa State University* (**36**, 4, p. 571) Article

J98-086 Numerical Study of Supersonic Direct Current Plasma Nozzle Flow. Bertrand Jodoin, Pierre Proulx, and Yves Mercadier, *Université de Sherbrooke, Canada* (**36**, 4, p. 578) Article

J98-087 Vortex Breakdown on Pitching Delta Wing: Control by Intermittent Trailing-Edge Blowing. Peter V. Vorobieff, *Los Alamos National Laboratory*; and Donald O. Rockwell, *Lehigh University* (**36**, 4, p. 585) Article

J98-088 Feasibility Study of Magnetohydrodynamics Acceleration of Unseeded and Seeded Airflows. Igor V. Adamovich and J. William Rich, *Ohio State University*; and Gordon L. Nelson, *MSE Inc.* (**36**, 4, p. 590) Article based on AIAA Paper 96-2347

J98-089 Modeling of Microcrack Damaged Composite Plates Undergoing Nonlinear Bimodular Flutter Oscillations. Taehyoun Kim, Satya N. Atluri, and Robert G. Loewy, *Georgia Institute of Technology* (**36**, 4, p. 598) Article

J98-090 Fast Newton–Krylov Method for Unstructured Grids. Max Blanco and David W. Zingg, *University of Toronto, Canada* (**36**, 4, p. 607) Article based on AIAA Paper 97-0331

J98-091 Fiber Architecture of Three-Dimensional Braided Composites. Soheil Mohajerjasbi, *Boeing Defense and Space Group* (**36**, 4, p. 613) Article based on AIAA Paper 97-1404

J98-092 Design Sensitivity Analysis of Hyperelastic Structures Using a Meshless Method. Iulian Grindeanu, *University of Iowa*;

Kuang-Hua Chang, *University of Oklahoma*; and Kyung K. Choi and Jiun-Shyan Chen, *University of Iowa* (**36**, 4, p. 618) Article

J98-093 Probabilistic Structural Durability Prediction. Xiaoming Yu, Kuang-Hua Chang, and Kyung K. Choi, *University of Iowa* (**36**, 4, p. 628) Article based on AIAA Paper 96-4063

J98-094 Acousto–Ultrasonic Characteristics for Contact-Type Transducers Coupled to Timoshenko Beam. T. Liu, *Nanjing University of Aeronautics and Astronautics, PRC*; S. Kitipornchai, *University of Queensland, Australia*; and K. M. Liew, *Nanyang Technological University, Singapore* (**36**, 4, p. 638) Article

J98-095 Fatigue of Cracked Plates Repaired with Single-Sided Composite Patches. T. Y. Kam, K. H. Chu, and Y. C. Tsai, *National Chiao Tung University, Taiwan, ROC* (**36**, 4, p. 645) Article

J98-096 Comparison of Various Orthogonal Polynomials in *hp*-Version Time Finite Element Method. Sungho Park and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University* (**36**, 4, p. 651) Article

J98-097 Optimization of Viscoelastic Compliant Walls for Transition Delay. K. S. Yeo, *National University of Singapore* (**36**, 4, p. 656) Technical Note

J98-098 Turbulence Structure in the Spiral Wake Shed by a Lifting Wing. Joseph A. Miranda and William J. Devenport, *Virginia Polytechnic Institute and State University* (**36**, 4, p. 658) Technical Note based on AIAA Paper 96-0804

J98-099 Aeroelasticity of Laminated Fiber-Reinforced Doubly Curved Shallow Shells. Maher N. Bismarck-Nasr, *Instituto Tecnológico de Aeronáutica, Brazil* (**36**, 4, p. 661) Technical Note

J98-100 Credible Computational Fluid Dynamics Simulations. Unmeel B. Mehta, *NASA Ames Research Center* (**36**, 5, p. 665) Article

J98-101 Toward Establishing Credibility in Computational Fluid Dynamics Simulations. Arthur Rizzi, *KTH Royal Institute of Technology, Sweden*; and Jan Vos, *Swiss Federal Institute of Technology* (**36**, 5, p. 668) Article based on AIAA Paper 96-2029

J98-102 Mesh Refinement and Modeling Errors in Flow Simulation. Antony Jameson and Luigi Martinelli, *Princeton University* (**36**, 5, p. 676) Article based on AIAA Paper 96-2050

J98-103 Issues in Computational Fluid Dynamics Code Verification and Validation. William L. Oberkampf and Frederick G. Blottner, *Sandia National Laboratories* (**36**, 5, p. 687) Article based on AIAA Paper 95-2226

J98-104 Verification of Codes and Calculations. Patrick J. Roache (**36**, 5, p. 696) Article based on AIAA Paper 95-2224

J98-105 Certifiable Computational Fluid Dynamics Through Mesh Optimization. W. G. Habashi, J. Dompierre, and Y. Bourgault, *Concordia University, Canada*; M. Fortin, *Université Laval, Canada*; and M.-G. Vallet, *National Research Council, Canada* (**36**, 5, p. 703) Article

J98-106 Aspects of Numerical Uncertainties in Time Marching to Steady-State Numerical Solutions. H. C. Yee, *NASA Ames Research Center*; and P. K. Sweby, *University of Reading, England, UK* (**36**, 5, p. 712) Article based on AIAA Paper 96-2052

J98-107 High-Speed Turbulent Separated Flows: Consistency of Mathematical Models and Flow Physics. David S. Dolling, *University of Texas at Austin* (**36**, 5, p. 725) Article

J98-108 Experimental Methodology for Computational Fluid Dynamics Code Validation. Daniel P. Aeschliman and William L. Oberkampf, *Sandia National Laboratories* (**36**, 5, p. 733) Article

J98-109 Computational Fluid Dynamics Validation Issues in Transition Modeling. Helen L. Reed, *Arizona State University*; Tim S. Haynes, *DYNACS Engineering Company*; and William S. Saric, *Arizona State University* (**36**, 5, p. 742) Article

J98-110 Role of Code Validation and Certification in the Design Environment. T. J. Barber, *United Technologies Research Center* (**36**, 5, p. 752) Article based on AIAA Paper 96-2033 CP964

J98-111 Validation Issues for Engine–Airframe Integration. John A. Benek and Edward M. Kraft, *Micro Craft, Inc.*; and Rodney F. Lauer, *Sverdrup Technology, Inc.* (**36**, 5, p. 759) Article based on AIAA Paper 96-2031

J98-112 Prediction of High-Lift Flows Using Turbulent Closure Models. Christopher L. Rumsey and Thomas B. Gatski, *NASA Langley Research Center*; Susan X. Ying, *The Boeing Company*; and Arild Bertelrud, *Analytical Services and Materials, Inc.* (**36**, 5, p. 765) Article

J98-113 Quadrature-Free Implementation of Discontinuous Galerkin Method for Hyperbolic Equations. Harold L. Atkins, *NASA Langley Research Center*; and Chi-Wang Shu, *Brown University* (**36**, 5, p. 775) Article based on AIAA Paper 96-1683

J98-114 Development of an Improved Kirchhoff Method for Jet Aeroacoustics. Anthony R. Pilon, *Univesity of Minnesota*; and Anastasios S. Lyrintzis, *Purdue University* (**36**, 5, p. 783) Article

J98-115 Unsteady Flowfield and Noise Propagation due to Transonic Airfoil–Airfoil Interaction. Kwanjung Yee, Dong-Ho Lee, and Soogab Lee, *Seoul National University, Korea* (**36**, 5, p. 791) Article

J98-116 Prediction of the High-Reynolds-Number Flow over a Two-Dimensional Bump. Xiaohua Wu and Kyle D. Squires, *Arizona State University* (**36**, 5, p. 799) Article

J98-117 Viscous and Inviscid Vortex Generation During Startup of Rocket Nozzles. F. Nasuti and M. Onofri, *University of Rome "La Sapienza," Italy* (**36**, 5, p. 809) Article based on AIAA Paper 96-0076

J98-118 Phenomenological Analysis of Shock-Wave Propagation in Weakly Ionized Plasmas. Igor V. Adamovich, Vish V. Subramaniam, and J. William Rich, *Ohio State University*; and Sergey O. Macheret, *Princeton University* (**36**, 5, p. 816) Article

J98-119 Active Control of Twin-Pulse Combusters. Michael Zeutzius, *Saga University, Japan*; Kunio Terao, *Yokohama National University, Japan*; and Toshiaki Setoguchi, Shigeru Matsuo, Toshihiro Nakano, and Yasuyuki Fujita, *Saga University, Japan* (**36**, 5, p. 823) Article

J98-120 Evaluation of Layerwise Mixed Theories for Laminated Plates Analysis. Ersasmo Carrera, *Turin Polytechnic Institute, Italy* (**36**, 5, p. 830) Article

J98-121 Residual Strength of Aging Aircraft with Multiple Site Damage/Multiple Element Damage. L. Wang, *University of California, Los Angeles*; and W. T. Chow, H. Kawai, and S. N. Atluri, *Georgia Institute of Technology* (**36**, 5, p. 840) Article

J98-122 Asymptotic Transfer Function Analysis of Conical Shells. Jianping Zhou and Yongjun Lei, *National University of Defense Technology, PRC* (**36**, 5, p. 848) Article

J98-123 Control-Structure Integrated Design with Closed-Form Design Metrics Using Physical Programming. Achille Messac, *Northeastern University* (**36**, 5, p. 855) Article

J98-124 Comparison of Three Navier–Stokes Equation Solvers for Supersonic Open Cavity Simulations. Paul D. Orkwis, *University of Cincinnati*; Balu Sekar, *U.S. Air Force Research Laboratory*; and Sukumar Chakravarthy and Oshin Peroomian, *Metacomp Technologies, Inc.* (**36**, 5, p. 865) Technical Note based on AIAA Paper 97-3163

J98-125 Geometrical Effects on the Near-Field Flow Structure of Coaxial Jets. H. Rehab, E. Villermaux, and E. J. Hopfinger, *Centre National de la Recherche Scientifique, France* (**36**, 5, p. 867) Technical Note

J98-126 Origin of Streamwise Vortices in Supersonic Jets. A.

Krothapalli, *Florida A&M University and Florida State University*; P. J. Strykowski, *University of Minnesota*; and C. J. King, *Rohr Industries, Inc.* (**36**, 5, p. 869) Technical Note

J98-127 Effect of Heating on Quiet Flow in a Mach 4 Ludwieg Tube. Steven P. Schneider, *Purdue University*; and Scott E. Munro, *Georgia Institute of Technology* (**36**, 5, p. 872) Technical Note

J98-128 Lanczos Method in Synchro Calculation of Eigenpairs and Their Derivatives. X. R. Yuan, E. L. Chen, and S. P. Yang, *Shijiazhuang Railway Institute, PRC* (**36**, 5, p. 874) Technical Note

J98-129 Virtual Member Method for the Analysis of Frame Structures with Damping Joints. Guidong Zhu, *Beijing Institute of Astronautical System Engineering, PRC*; and Gangtie Zheng and Chengxun Shao, *Harbin Institute of Technology, PRC* (**36**, 5, p. 875) Technical Note

J98-130 Wave Number Frequency Spectra of a Lifting Wake for Broadband Noise Prediction. William J. Devenport and Christian W. Wenger, *Virginia Polytechnic Institute and State University*; Stewart A. L. Glegg, *Florida Atlantic University*; and Joseph A. Miranda, *U.S. Naval Undersea Warfare Center* (**36**, 6, p. 881) Article based on AIAA Paper 97-1699 CP974

J98-131 Modeling of Spatial Wind–Wave Correlations. Bård Venås and Lars R. Sætran, *Norwegian University of Science and Technology*; and John B. Fossdal, *Kongsberg Aerospace, Norway* (**36**, 6, p. 888) Article based on AIAA Paper 97-0638

J98-132 Measurement of Continuous Pressure and Shear Distributions Using Coating and Imaging Techniques. Daniel C. Reda, Michael C. Wilder, Rabindra D. Mehta, and Gregory Zilliac, *NASA Ames Research Center* (**36**, 6, p. 895) Article based on AIAA Paper 97-2489

J98-133 Experimental Validation of Lifting Surface Theory for Rotor–Stator Interaction Noise Generation. Pieter Sijtsma, Edward R. Rademaker, and Johan B. H. M. Schulten, *National Aerospace Laboratory NLR, The Netherlands* (**36**, 6, p. 900) Article based on AIAA Paper 96-1744

J98-134 Radiated Noise from Airfoils in Realistic Mean Flows. David P. Lockard and Philip J. Morris, *Pennsylvania State University* (**36**, 6, p. 907) Article based on AIAA Paper 97-0286

J98-135 Experimental and Numerical Study of Supersonic Film Cooling. B. Aupoix, A. Mignosi, S. Viala, F. Bouvier, and R. Gaillard, *ONERA, France* (**36**, 6, p. 915) Article based on AIAA Paper 96-0657

J98-136 Interacting Vortex and Vortex Layer: How Length Scale Affects Entrainment and Ejection. Oliver V. Atassi, Andrew J. Bernoff, and Seth Lichter, *Northwestern University* (**36**, 6, p. 924) Article based on AIAA Paper 96-2140

J98-137 Examination of Diffusion Modeling Using Zero-Mean-Shear Turbulence. A. G. Straatman, *University of Western Ontario, Canada*; and G. D. Stubley and G. D. Raithby, *University of Waterloo, Canada* (**36**, 6, p. 929) Article

J98-138 Evaluation of Reynolds Stress Closure for Turbulent Boundary Layer in Turbulent Freestream. J. C. Mackinnon, M. Renksizbulut, and A. B. Strong, *University of Waterloo, Canada* (**36**, 6, p. 936) Article

J98-139 Parallel Implicit Time-Accurate Navier–Stokes Computations Using Coarse Grid Correction. Carl B. Jenssen, *SINTEF—Foundation for Scientific and Industrial Research, Norway*; and Per Å. Weinerfelt, *Saab AB, Sweden* (**36**, 6, p. 946) Article based on AIAA Paper 96-2402 CP965

J98-140 Robust and Efficient Cartesian Mesh Generation for Component-Based Geometry. M. J. Aftosmis, *NASA Ames Research Center*; M. J. Berger, *New York University*; and J. E. Melton, *NASA Ames Research Center* (**36**, 6, p. 952) Article

J98-141 Efficient Parallel Communication Schemes for Computational Fluid Dynamics Codes. N. Gopalaswamy, A. Ecer, H. U. Akay, and Y. P. Chien, *Indiana University—Purdue University at Indianapolis* (**36**, 6, p. 961) Article based on AIAA Paper 97-0027

J98-142 Time- and Frequency-Domain Numerical Simulation of Linearized Euler Equations. Kidambi Sreenivas and David L. Whitfield, *Mississippi State University* (**36**, 6, p. 968) Article based on AIAA Paper 93-2934 CP931

J98-143 Method for Correlating Discharge Coefficients of Film-Cooling Holes. Michael Gritsch, Achmed Schulz, and Sigmar Wittig, *University of Karlsruhe, Germany* (**36**, 6, p. 976) Article

J98-144 Numerical Simulation of Three-Dimensional Trailing Vortex Evolution in Stratified Fluid. Robert E. Robins and Donald P. Delisi, *Northwest Research Associates, Inc.* (**36**, 6, p. 981) Article

J98-145 Numerical Study of Nozzle Exit Condition Effects on Jet Development. Thomas S. Chyczewski, Lyle N. Long, and Philip J. Morris, *Pennsylvania State University* (**36**, 6, p. 986) Article

J98-146 Some Specific Characteristics of Turbulence in the Reactive Wakes of Bluff Bodies. Stéphane Sanquer, Pascal Bruel, and Bruno Deshaies, *Centre National de la Recherche Scientifique, France* (**36**, 6, p. 994) Article based on AIAA Paper 96-3034

J98-147 Exponentially Accelerating Jet in Crossflow. Adnan Eroglu and Robert E. Breidenthal, *University of Washington* (**36**, 6, p. 1002) Article

J98-148 Modeling the Flow of Water on Aircraft in Icing Conditions. Tim G. Myers and Chris P. Thompson, *Cranfield University, England, UK* (**36**, 6, p. 1010) Article

J98-149 Passive Control of Pressure Fluctuations Generated by Separated Flow. A. F. Heenan and J. F. Morrison, *Imperial College, England, UK* (**36**, 6, p. 1014) Article based on AIAA Paper 96-0445

J98-150 Controlling Unsteady Separation on a Cylinder with a Driven Flexible Wall. Dipankar Pal and Sumon K. Sinha, *University of Mississippi* (**36**, 6, p. 1023) Article based on AIAA Paper 97-0212

J98-151 Numerical Study of Scram Accelerator Starting Characteristics. Jeong-Yeol Choi, In-Seuck Jeung, and Youngbin Yoon, *Seoul National University, Korea* (**36**, 6, p. 1029) Article based on AIAA Paper 97-0915

J98-152 Reduced-Order Modeling of Unsteady Viscous Flow in a Compressor Cascade. Razvan Florea, Kenneth C. Hall, and Paul G. A. Cizmas, *Duke University* (**36**, 6, p. 1039) Article based on AIAA Paper 96-2572

J98-153 Emission and Holographic Interferometry Measurements in a Superorbital Expansion Tube. Timothy J. McIntyre, Alexis I. Bishop, Amberyn M. Thomas, Margaret J. Wegener, and Halina Rubinsztein-Dunlop, *University of Queensland, Australia* (**36**, 6, p. 1049) Article based on AIAA Paper 97-0775

J98-154 Velocimetry and Thermometry of Supersonic Flow Around a Cylindrical Body. Peter F. Barker, Amberyn M. Thomas, Timothy J. McIntyre, and Halina Rubinsztein-Dunlop, *University of Queensland, Australia* (**36**, 6, p. 1055) Article based on AIAA Paper 97-0496

J98-155 Velocity Measurement in Hypersonic Flows Using Electron-Beam-Assisted Glow Discharge. S. Larigaldie, D. Bize, A. K. Mohamed, M. Ory, J. Soutadé, and J. P. Taran, *ONERA, France* (**36**, 6, p. 1061) Article

J98-156 Behavior of Composite Shells Under Transverse Impact and Quasi-Static Loading. Brian L. Wardle and Paul A. Lagace, *Massachusetts Institute of Technology* (**36**, 6, p. 1065) Article based on AIAA Paper 97-1059 CP973

J98-157 Vibration Technique for Locating Delamination in a Composite Beam. Colin P. Ratcliffe and William J. Bagaria, *U.S. Naval Academy* (**36**, 6, p. 1074) Article

J98-158 Helicopter Rotor System Fault Detection Using Physics-Based Model and Neural Networks. Ranjan Ganguli and Inderjit Chopra, *University of Maryland*; and David J. Haas, *U.S. Naval Surface Warfare Center* (**36**, 6, p. 1078) Article

J98-159 Shell Modeling of Fretting in Riveted Lap Joints. G. Harish and T. N. Farris, *Purdue University* (**36**, 6, p. 1087) Article based on AIAA Paper 97-1340 CP973

J98-160 Updating Structural Dynamic Models with Emphasis on the Damping Properties. Amar T. Chouaki, Pierre Ladevèze, and Laurent Proslier, *Laboratoire de Mécanique et Technologie–Cachan, France* (**36**, 6, p. 1094) Article

J98-161 Soft Lattice Truss Static Polynomial Response Using Energy Methods. Winfred S. Kenner, *NASA Langley Research Center*; and Norman F. Knight Jr., *Old Dominion University* (**36**, 6, p. 1100) Article based on AIAA Paper 97-1376 CP973

J98-162 Genetic Algorithm Development for Multiobjective Optimization of Structures. Franklin Y. Cheng and Dan Li, *University of Missouri–Rolla* (**36**, 6, p. 1105) Article

J98-163 Sensitivity Analysis of Nonlinear Material and Its Application to Shape Optimization. Koetsu Yamazaki, *Kanazawa University, Japan*; and Kazuhiro Shibuya, *YHP, Inc., Japan* (**36**, 6, p. 1113) Technical Note based on AIAA Paper 95-1364 CP952

J98-164 Interaction Region of Turbulent Expansion-Corner Flow. K. Chung, *National Cheng Kung University, Taiwan, ROC* (**36**, 6, p. 1115) Technical Note

J98-165 Improved Aerodynamic Characterization of Regular Three-Dimensional Roughness. D. R. Waigh and R. J. Kind, *Carleton University, Canada* (**36**, 6, p. 1117) Technical Note

J98-166 Static and Dynamic Aeroelasticity of Advanced Aircraft Wings Carrying External Stores. Frank H. Gern and Liviu Librescu, *Virginia Polytechnic Institute and State University* (**36**, 7, p. 1121) Article

J98-167 Challenges in Understanding the Vortex Dynamics of Helicopter Rotor Wakes. J. Gordon Leishman and Ashish Bagai, *University of Maryland* (**36**, 7, p. 1130) Article based on AIAA Paper 96-1957

J98-168 Pressure Oscillations in a Subsonic Cavity at Yaw. P. J. Disimile, *University of Cincinnati*; and N. Toy and E. Savory, *University of Surrey, England, UK* (**36**, 7, p. 1141) Article

J98-169 Experimental Investigation of Unsteady Aerodynamics and Aeroacoustics of a Thin Airfoil. R. J. Minniti III and T. J. Mueller, *University of Notre Dame* (**36**, 7, p. 1149) Article

J98-170 Turbulent Boundary-Layer Control by Means of Spanwise-Wall Oscillation. Kwing-So Choi, Jean-Robert DeBisschop, and Brian R. Clayton, *University of Nottingham, England, UK* (**36**, 7, p. 1157) Article based on AIAA Paper 97-1795

J98-171 Modeling Near-Wall Effects in Axially Rotating Pipe Flow by Elliptic Relaxation. B. A. Pettersson, *Kongsberg Defense and Aerospace, Norway*; and H. I. Andersson and A. S. Brunvoll, *Norwegian University of Science and Technology* (**36**, 7, p. 1164) Article

J98-172 Boundary-Layer Receptivity to Transient Convected Disturbances. Anthony J. Dietz, *NASA Ames Research Center* (**36**, 7, p. 1171) Article based on AIAA Paper 97-1962

J98-173 Premixed Turbulent Flame/Flow Interaction: Simultaneous Measurements of Velocity and Flamelet Position. P. C. Miles, *Sandia National Laboratories*; and F. C. Gouldin, *Cornell University* (**36**, 7, p. 1178) Article based on AIAA Paper 96-3030

J98-174 Flame Structure Interactions and State Relationships in an Unsteady Partially Premixed Flame. Suresh K. Aggarwal and Ishwar K. Puri, *University of Illinois at Chicago* (**36**, 7, p. 1190) Article

J98-175 Specification of Model Entrance Conditions for Scramjet Testing in Vitiated Air. A. D. Cutler, *George Washington University and NASA Langley Reseach Center* (**36**, 7, p. 1200) Article

J98-176 Computations of Steady and Unsteady Low-Speed Turbulent Separated Flows. Reece E. Neel, Robert W. Walters, and Roger L. Simpson, *Virginia Polytechnic Institute and State University* (**36**, 7, p. 1208) Article based on AIAA Paper 97-0653

J98-177 Velocity and Density Measurements in Supersonic High-Temperature Exhaust Plumes. L. Y. Jiang and J. P. Sislian, *University of Toronto, Canada* (**36**, 7, p. 1216) Article

J98-178 Numerical Simulation of High-Speed Civil Transport Inlet Operability with Angle of Attack. Ge-Cheng Zha, Doyle Knight, and Donald Smith, *Rutgers University*; and Martin Haas, *United Technologies Research Center* (**36**, 7, p. 1223) Article

J98-179 Passive Control of Supersonic Rectangular Jets via Nozzle Trailing-Edge Modifications. M. Samimy, J.-H. Kim, P. S. Clancy, and S. Martens, *The Ohio State University* (**36**, 7, p. 1230) Article

J98-180 Experimental and Computational Investigation of the Knoller–Betz Effect. K. D. Jones, C. M. Dohring, and M. F. Platzer, *U.S. Naval Postgraduate School* (**36**, 7, p. 1240) Article based on AIAA Paper 96-0078

J98-181 Quantitative Imaging in Proper Orthogonal Decomposition of Flow Past a Delta Wing. K. M. Cipolla, A. Liakopoulos, and D. O. Rockwell, *Lehigh University* (**36**, 7, p. 1247) Article

J98-182 Flow Through a Curved Duct Using Nonlinear Two-Equation Turbulence Models. Fotis Sotiropoulos and Yiannis Ventikos, *Georgia Institute of Technology* (**36**, 7, p. 1256) Article

J98-183 Near Field of the Tip Vortex Behind an Oscillating Rectangular Wing. B. R. Ramaprian and Youxin Zheng, *Washington State University* (**36**, 7, p. 1263) Article

J98-184 Tomographic Analysis of Unsteady, Reacting Flows: Numerical Investigation. Erik D. Torniainen, Alexander K. Hinz, and Frederick C. Gouldin, *Cornell University* (**36**, 7, p. 1270) Article based on AIAA Paper 97-0257

J98-185 Compressive Behavior of Multiply Delaminated Composite Laminates Part 1: Experiment and Analytical Development. Hiroshi Suemasu, Tatsuya Kumagai, and Katsuhisa Gozu, *Sophia University, Japan* (**36**, 7, p. 1279) Article based on AIAA Paper 94-1368 CP942

J98-186 Compressive Behavior of Multiply Delaminated Composite Laminates Part 2: Finite Element Analysis. Hiroshi Suemasu and Tatsuya Kumagai, *Sophia University, Japan* (**36**, 7, p. 1286) Article based on AIAA Paper 94-1368

J98-187 Unified Finite Element Method for Engineering Systems with Hybrid Uncertainties. Singiresu S. Rao, Li Chen, and Eric Mulkay, *Purdue University* (**36**, 7, p. 1291) Article

J98-188 Fatigue Crack Growth Predictions in Aging Aircraft Panels Using Optimization Neural Network. R. M. V. Pidaparti and M. J. Palakal, *Purdue University at Indianapolis* (**36**, 7, p. 1300) Article

J98-189 Enhanced Structural Damage Detection Using Alternating Projection Methods. Musa O. Abdalla, Karolos M. Grigoriadis, and David C. Zimmerman, *University of Houston* (**36**, 7, p. 1305) Article

J98-190 Time Domain Finite Element Analysis of Dynamic Systems. Jinyoung Suk and Youdan Kim, *Seoul National University, Korea* (**36**, 7, p. 1312) Article

J98-191 New Structural Dynamic Condensation Method for Finite Element Models. Zu-Qing Qu and Zhi-Fang Fu, *Shanghai*

Jiao Tong University, PRC (**36**, 7, p. 1320) Article

J98-192 Method for Generating Equilibrium Swirling Inflow Conditions. Charles D. Pierce and Parviz Moin, *Stanford University* (**36**, 7, p. 1325) Technical Note

J98-193 Prediction of Shock Angles Caused by Sharp Delta Wings with Attack Angle. S. Koide, *Japan Defense Agency, Japan*; and A. F. Loria and H. Babinsky, *Cambridge University, England, UK* (**36**, 7, p. 1327) Technical Note

J98-194 Observations of Supersonic Flat Plate Wake Transition. N. T. Clemens and M. F. Smith, *University of Texas at Austin* (**36**, 7, p. 1328) Technical Note based on AIAA Paper 96-0785

J98-195 Interaction of Large Three-Dimensional Eddies and Small Streamwise Vortices. Roy Y. Myose, *Wichita State University*; and Ron F. Blackwelder, *University of Southern California* (**36**, 7, p. 1330) Technical Note based on AIAA Paper 97-0442

J98-196 Constrained Damage Detection Technique for Simultaneously Updating Mass and Stiffness Matrices. Jason Kiddy and Darryll Pines, *University of Maryland* (**36**, 7, p. 1332) Technical Note

J98-197 Overview of the NASA Microgravity Combustion Program. Merrill K. King, *NASA Headquarters*; and Howard D. Ross, *NASA Lewis Research Center* (**36**, 8, p. 1337) Article

J98-198 Structure and Soot Properties of Nonbuoyant Ethylene/Air Laminar Jet Diffusion Flames. D. L. Urban, Z.-G. Yuan, and P. B. Sunderland, *NASA Lewis Research Center*; G. T. Linteris and J. E. Voss, *NASA Johnson Space Center*; and K. C. Lin, Z. Dai, K. Sun, and G. M. Faeth, *University of Michigan* (**36**, 8, p. 1346) Article

J98-199 Experimental Study of Flame Balls in Space: Preliminary Results from the STS-83. Paul D. Ronney, Ming-Shin Wu, and Howard G. Pearlman, *University of Southern California*; and Karen J. Weiland, *NASA Lewis Research Center* (**36**, 8, p. 1361) Article

J98-200 Microgravity *n*-Heptane Droplet Combustion in Oxygen–Helium Mixtures at Atmospheric Pressure. V. Nayagam, J. B. Haggard Jr., and R. O. Colantonio, *NASA Lewis Research Center*; A. J. Marchese and F. L. Dryer, *Princeton University*; and B. L. Zhang and F. A. Williams, *University of California, San Diego* (**36**, 8, p. 1369) Article

J98-201 Analytical Comparison of the Acoustic Analogy and Kirchhoff Formulation for Moving Surfaces. Kenneth S. Brentner and F. Farassat, *NASA Langley Research Center* (**36**, 8, p. 1379) Article

J98-202 Broadband Self-Noise from a Ducted Fan. Stewart A. L. Glegg and Cyrille Jochault, *Florida Atlantic University* (**36**, 8, p. 1387) Article based on AIAA Paper 97-1612 CP974

J98-203 Influence of Nozzle Geometry on the Noise of High-Speed Jets. Christopher K. W. Tam, *Florida State University* (**36**, 8, p. 1396) Article

J98-204 K–ϵ and Reynolds Stress Turbulence Model Comparisons for Two-Dimensional Injection Flows. Clarence F. Chenault and Philip S. Beran, *U.S. Air Force Institute of Technology* (**36**, 8, p. 1401) Article

J98-205 Essentially Nonoscillatory Euler Solutions on Unstructured Meshes Using Extrapolation. D. Stanescu and W. G. Habashi, *Concordia University, Canada* (**36**, 8, p. 1413) Article based on AIAA Paper 97-0539

J98-206 Solution of the Unsteady Euler Equations Using an Implicit Dual-Time Method. L. Dubuc, F. Cantariti, M. Woodgate, B. Gribben, K. J. Badcock, and B. E. Richards, *University of Glasgow, Scotland, UK* (**36**, 8, p. 1417) Article

J98-207 Simulations of Planar Flapping Jets in Confined Channels. Francine Battaglia, Anil K. Kulkarni, Jinzhang Feng, and Charles L. Merkle, *Pennsylvania State University* (**36**, 8, p. 1425) Article

J98-208 Suppression of Flame Wrinkling by Buoyancy: The Baroclinic Stabilization Mechanism. Jose O. Sinibaldi, Charles J. Mueller, Alan E. Tulkki, and James F. Driscoll, *University of Michigan* (**36**, 8, p. 1432) Article

J98-209 Large-Eddy Simulations and Lidar Measurements of Vortex-Pair Breakup in Aircraft Wakes. D. C. Lewellen and W. S. Lewellen, *West Virginia University*; L. R. Poole, *NASA Langley Research Center*; R. J. DeCoursey, *Science Applications International Corporation*; G. M. Hansen, *Science and Technology Corporation*; C. A. Hostetler, *NASA Langley Research Center*; and G. S. Kent, *Science and Technology Corporation* (**36**, 8, p. 1439) Article

J98-210 Space-Based-Laser Wavelength Selection for Existing Beam Control Technology Levels. Frederic H. White, *Science Applications International Corporation* (**36**, 8, p. 1446) Article based on AIAA Paper 97-2421

J98-211 Particle Image Velocimetry via Wavelet Analysis. Jeonghwan Ko, Andrew J. Kurdila, Jose L. Gilarranz, and Othon K. Rediniotis, *Texas A&M University* (**36**, 8, p. 1451) Article

J98-212 Luminescent Oil-Film Skin-Friction Meter. Tianshu Liu and J. P. Sullivan, *Purdue University* (**36**, 8, p. 1460) Article

J98-213 Dynamic Modeling of a Smart Materials Robot. S. S. Ge, T. H. Lee, and J. Q. Gong, *National University of Singapore* (**36**, 8, p. 1466) Article

J98-214 Identification Approach to Estimate Buckling Load of Damaged Composite Plates. Anil L. Salunkhe and Prasanna M. Mujumdar, *Indian Institute of Technology* (**36**, 8, p. 1479) Article based on AIAA Paper 97-1160 CP973

J98-215 Transient Response Analysis of Nonlinear Modally Coupled Structural Dynamics Equations of Motion. Joseph A. Fromme and Michael A. Goldberg (**36**, 8, p. 1486) Article based on AIAA Paper 97-1280 CP973

J98-216 Multiple-Criterion Method for Determining Structural Damage. Tshilidzi Marwala and P. Stephan Heyns, *University of Pretoria, South Africa* (**36**, 8, p. 1494) Article

J98-217 Dynamic Response of Initially Loaded Piezoelectric Plates Composed of Short Fibers. Wen-Shyong Kuo, *Feng Chia University, Taiwan, ROC* (**36**, 8, p. 1502) Article

J98-218 Practical Procedures for Reliability Estimation of Spacecraft Structures and Their Components. Gerhard S. Székely, *Leopold-Franzens University, Austria*; Wolfgang H. Teichert, *Atos Netherlands BV*; Christoph E. Brenner and Helmut J. Pradlwarter, *Leopold-Franzens University, Austria*; Michel Klein, *European Space Agency, The Netherlands*; and Gerhart I. Schüeller, *Leopold-Franzens University, Austria* (**36**, 8, p. 1509) Article

J98-219 Pretwisted Nonuniform Beams with Time-Dependent Elastic Boundary Conditions. Shueei Muh Lin, *Kung Shan Institute of Technology, Taiwan, ROC* (**36**, 8, p. 1516) Article

J98-220 Three-Dimensional Free Vibration of Pretwisted Beams. Abdullah S. Balhaddad and Dipo Onipede Jr., *University of Pittsburgh* (**36**, 8, p. 1524) Article

J98-221 Elasticity Approach for Delamination Buckling of Composite Beam Plates. Haozhong Gu and Aditi Chattopadhyay, *Arizona State University* (**36**, 8, p. 1529) Article based on AIAA Paper 96-1612 CP962

J98-222 Use of Piezoelectric Actuators for Airfoil Separation Control. A. Seifert, S. Eliahu, D. Greenblatt, and I. Wygnanski, *Tel-Aviv University, Israel* (**36**, 8, p. 1535) Technical Note

J98-223 Use of Analytical Flow Sensitivities in Static Aeroelasticity. Richard W. Newsome, *Allison Advanced Development Company*; and Gal Berkooz and Rajesh Bhaskaran, *Beam Technologies, Inc.* (**36**, 8, p. 1537) Technical Note

J98-224 Limit Cycle Measurements from a Cantilever Beam Attached to a Rotating Body. Christopher L. Lee, *Lawrence Livermore National Laboratory* (**36**, 8, p. 1540) Technical Note

J98-225 Application of Parabolized Stability Equations to the Prediction of Jet Instabilities. C. C. Yen and N. L. Messersmith, *Purdue University* (**36**, 8, p. 1541) Technical Note

J98-226 Laser Doppler Velocimetry Velocity Bias in Turbulent Open Channel Flow. M. Balakrishnan and C. L. Dancey, *Virginia Polytechnic Institute and State University* (**36**, 8, p. 1544) Technical Note

J98-227 Comparative Analysis of Deployable Truss Structures for Mesh Antenna Reflectors. Jin Mitsugi, *Nippon Telegraph and Telephone Corporation, Japan* (**36**, 8, p. 1546) Technical Note

J98-228 Measurement and Analysis of the Flowfields Induced by Suction Perforations. D. G. MacManus and J. A. Eaton, *National University of Ireland, UK* (**36**, 9, p. 1553) Article

J98-229 Transport Enhancement in Acoustically Excited Cavity Flows, Part 1: Nonreactive Flow Diagnostics. Y. Kang, A. R. Karagozian, and O. I. Smith, *University of California, Los Angeles* (**36**, 9, p. 1562) Article

J98-230 Transport Enhancement in Acoustically Excited Cavity Flows, Part 2: Reactive Flow Diagnostics. C. P. Cadou, O. I. Smith, and A. R. Karagozian, *University of California, Los Angeles* (**36**, 9, p. 1568) Article

J98-231 Airfoil Self–Noise Generated in a Cascade. Stewart A. L. Glegg, *Florida Atlantic University* (**36**, 9, p. 1575) Article based on AIAA Paper 96-1739

J98-232 Morkovin Hypothesis and the Modeling of Wall–Bounded Compressible Turbulent Flows. R. M. C. So, *Hong Kong Polytechnic University;* T. B. Gatski, *NASA Langley Research Center;* and T. P. Sommer, *ABB Power Generation, Ltd., Switzerland* (**36**, 9, p. 1583) Article

J98-233 Adaptive Grid Sequencing and Interpolation Schemes for Helicopter Rotor Wake Analyses. Ashish Bagai and J. Gordon Leishman, *University of Maryland* (**36**, 9, p. 1593) Article based on AIAA Paper 97-2327 CP978

J98-234 Data–Parallel Line Relaxation Method for the Navier–Stokes Equations. Michael J. Wright, Graham V. Candler, and Deepak Bose, *University of Minnesota* (**36**, 9, p. 1603) Article based on AIAA Paper 97-2046

J98-235 Low–Diffusion Flux–Splitting Methods for Flows at All Speeds. Jack R. Edwards, *North Carolina State University;* and Meng-Sing Liou, *NASA Lewis Research Center* (**36**, 9, p. 1610) Article based on AIAA Paper 97-1862

J98-236 Nozzle Flow Separation. G. L. Romine, *Lockheed Martin Astronautics* (**36**, 9, p. 1618) Article

J98-237 Immediate and Near Wake Flow Patterns Behind Slotted Disks. Hiroshi Higuchi, Jinzhong Zhang, and Shojiro Furuya, *Syracuse University;* and Brian K. Muzas, *Syracuse University* (**36**, 9, p. 1626) Article based on AIAA Paper 97-1480 CP975

J98-238 Scaling the Near–Field Centerline Mixing Behavior of Axisymmetric Turbulent Jets. George Papadopoulos and William M. Pitts, *National Institute of Standards and Technology* (**36**, 9, p. 1635) Article based on AIAA Paper 98-0695

J98-239 Self–Consistent Modeling of Volume and Surface Processes in Air Plasma. B. F. Gordiets and C. M. Ferreira, *Instituto Superior Técnico, Portugal* (**36**, 9, p. 1643) Article based on AIAA Paper 97-2504

J98-240 Pressure–Based Compressible Calculation Method Utilizing Total Variation Diminishing Schemes. R. I. Issa and M. H. Javareshkian, *Imperial College of Science, Technology, and Medicine, England, UK* (**36**, 9, p. 1652) Article

J98-241 Unsteady Vortex Structure over Delta-Wing Subject to Transient Along–Core Blowing. Cheng-Hsiung Kuo and Ni-Yu Lu, *National Chung Hsing University, Taiwan, ROC* (**36**, 9, p. 1658) Article

J98-242 Modeling Flow and Heat Transfer in Vortex Burners. Anatoly Borissov, Vladimir Shtern, and Fazle Hussain, *University of Houston* (**36**, 9, p. 1665) Article based on AIAA Paper 97-1998

J98-243 Decay of Wake Vortices of Large Aircraft. Turgut Sarpkaya, *U.S. Naval Postgraduate School* (**36**, 9, p. 1671) Article based on AIAA Paper 98-0592

J98-244 Eigenstructure Assignment Technique for Damage Detection in Rotating Structures. Jason Kiddy and Darryll Pines, *University of Maryland* (**36**, 9, p. 1680) Article

J98-245 Design Sensitivity Metric for Structural Dynamic Response. Hector A. Jensen, *Federico Santa Maria University, Chile;* and Abdon E. Sepulveda, *University of California, Los Angeles* (**36**, 9, p. 1686) Article

J98-246 Adaptive Shape Control of Laminated Composite Plates Using Piezoelectric Materials. S. Varadarajan, K. Chandrashekhara, and S. Agarwal, *University of Missouri–Rolla* (**36**, 9, p. 1694) Article based on AIAA Paper 96-1288 CP963

J98-247 Global/Local Postbuckling Failure Analysis of Composite Stringer/Skin Panels. H. Alesi, V. M. Nguyen and N. Mileshkin, *Royal Melbourne Institute of Technology, Australia;* and R. Jones, *Monash University, Australia* (**36**, 9, p. 1699) Article

J98-248 Effect of Correlation on Reliability–Based Design of Composite Plate for Buckling. Nozomu Kogiso, Shaowen Shao, and Yoshisada Murotsu, *Osaka Prefecture Unversity, Japan* (**36**, 9, p. 1706) Article based on AIAA Paper 97-1329 CP973

J98-249 Influence of Curing Stresses on Extension—Twist Coupling in Laminated Composite Strips. Andrew Makeev, Erian A. Armanios, and David Hooke, *Georgia Institute of Technology* (**36**, 9, p. 1714) Article

J98-250 Improved First–Order Approximation of Eigenvalues and Eigenvectors. Prasanth B. Nair, Andrew J. Keane, and Robin S. Langley, *University of Southampton, England, UK* (**36**, 9, p. 1721) Article

J98-251 Extension of the k–ω Shear-Stress Transport Turbulence Model for Rough–Wall Flows. Antti Hellsten and Seppo Laine, *Helsinki University of Technology, Finland* (**36**, 9, p. 1728) Technical Note

J98-252 Forcing of Compressible Mixing Layers Using Laser Excitation. Gregory S. Elliott, Jason Crawford, and Andrew Mosedale, *Rutgers University* (**36**, 9, p. 1730) Technical Note

J98-253 Artificial Dissipation Schemes for Viscous Airfoil Computations. K. Frew, D. W. Zingg, and S. De Rango, *University of Toronto, Canada* (**36**, 9, p. 1732) Technical Note based on AIAA Paper 96-1970

J98-254 Generalized Meshing Environment for Computational Mechanics. Lawrence W. Spradley, *ResearchSouth, Inc.;* Rainald Löhner, *George Mason University;* and T. J. Chung, *University of Alabama in Hunstville* (**36**, 9, p. 1735) Technical Note

J98-255 Jets in Ground Effect with a Crossflow. Jorge M. M. Barata, *Universidade da Beira Interior, Portugal* (**36**, 9, p. 1737) Technical Note based on AIAA Paper 97-0715

J98-256 Mixing of Coaxial Jets with Small Annular Area in a Short Duct. S. D. Sharma and M. R. Ahmed, *Indian Institute of Technology* (**36**, 9, p. 1740) Technical Note

J98-257 Concentration and Temperature Profiles of Diffusion Flames in Droptower Experiments. K. Tittmann, L. Sitzki, and H. Rau, *Otto-von-Guericke-University Magdeburg, Germany;* F. Wienecke, *Institute of Fire Department Saxonia-Anhalt, Germany;* and R. Grabski, *Institute of Fire Department Saxonia-Anhalt, Germany* (**36**, 9, p. 1743) Technical Note based on AIAA Paper 97-0673

J98-258 Explicit Equation for Flow Through American Society of Mechanical Engineers Nozzle Meters. W. Bussman and J. White, *Koch–Glitsch, Inc.* (**36**, 9, p. 1744) Technical Note

J98-259 Accounting for Effects of a System Rotation on the Pressure–Strain Correlation. B. A. Younis, *City University, England, UK;* C. G. Speziale, *Boston University;* and S. A. Berger, *University of California, Berkeley* (**36**, 9, p. 1746) Technical Note

J98-260 Vortical Layer Analysis on Perturbed Conical Flow. Sheam-Chyun Lin and Yung-Tai Chou, *National Taiwan University of Science and Technology* (**36**, 9, p. 1748) Technical Note

J98-261 Measurement of Vegetation Sweep–Up at High Shock Overpressure. R. G. Batt and S. A. Peabody II, *TRW Space and Defense* (**36**, 9, p. 1751) Technical Note

J98-262 Limitations of a Reduced Model for the Simulation of Hydrogen/Air Combustion. W. Shawn Westmoreland and Pasquale Cinnella, *Mississippi State University* (**36**, 9, p. 1752) Technical Note

J98-263 Higher–Order Subiteration–Free Staggered Algorithm for Nonlinear Transient Aeroelastic Problems. M. Lesoinne and C. Farhat, *University of Colorado* (**36**, 9, p. 1754) Technical Note

J98-264 Perturbation Method for Condensation of Eigenproblems. Ki-Ook Kim, *Inha University, Korea* (**36**, 9, p. 1757) Technical Note

J98-265 Structural Approximate Reanalysis for Topological Modifications of Finite Element Systems. Suhuan Chen, Cheng Huang, and Zhongsheng Liu, *Jilin University of Technology, PRC* (**36**, 9, p. 1760) Technical Note

J98-266 Optimization of Piezoceramic Sensor/Actuator Placement for Vibration Control of Laminated Plates. Young Kyu Kang, *University of Manchester, England, UK;* Hyun Chul Park and Brij Agrawal, *U.S. Naval Postgraduate School* (**36**, 9, p. 1763) Technical Note

J98-269 Near-Wall k–ε Computation of Transonic Turbomachinery Flows with Tip Clearance. G. A. Gerolymos, G. Tsanga, and I. Vallet, *Université Pierre-et-Marie-Curie, France* (**36**, 10, p. 1769) Article

J98-270 Flowfield Around Ogive/Elliptic-Tip Cylinder at High Angle of Attack. S. C. Luo, T. T. Lim, K. B. Lua, and H. T. Chia, *National University of Singapore*; and E. K. R. Goh and Q. W. Ho, *Defence Science Organisation* (**36**, 10, p. 1778) Article

J98-271 Continuity of Lifting Surface Theory in Subsonic and Supersonic Flow. Tetsuhiko Ueda, *National Aerospace Laboratory, Japan* (**36**, 10, p. 1788) Article

J98-272 Unsteady Stall Control Using Dynamically Deforming Airfoils. M. S. Chandrasekhara, *U.S. Naval Postgraduate School*; M C. Wilder, *MCAT, Inc.*; and L. W. Carr, *NASA Ames Research Center* (**36**, 10, p. 1792) Article based on AIAA Paper 97-2236 CP978

J98-273 Numerical Simulation of the Generation of Axisymmetric Mode Jet Screech Tones. Hao Shen and Christopher K. W. Tam, *Florida State University* (**36**, 10, p. 1801) Article based on AIAA Paper 98-0283

J98-274 Characterization of the Pressure Fluctuations Under a Fully Developed Turbulent Boundary Layer. S. P. Gravante, A. M. Naguib, C. E. Wark, and H. M. Nagib, *Illinois Institute of Technology* (**36**, 10, p. 1808) Article

J98-275 Time-Series Analyses of Wall Pressure Fluctuations in Plume-Induced Separated Flowfields. R. J. Shaw, *SY Technology, Inc.*; and J. C. Dutton and A. L. Addy, *University of Illinois at Urbana–Champaign* (**36**, 10, p. 1817) Article

J98-276 Further Development of the k–ζ (Enstrophy) Turbulence Closure Model. D. F. Robinson and H. A. Hassan, *North Carolina State University* (**36**, 10, p. 1825) Article

J98-277 Prediction Method of Unsteady Combustion Around Hypersonic Projectile in Stoichiometric Hydrogen–Air. Akiko Matsuo, *Keio University, Japan*; and Kozo Fujii, *Institute of Space and Astronautical Science, Japan* (**36**, 10, p. 1834) Article based on AIAA Paper 96-3137

J98-278 Nonclassical Dense Gas Flows for Simple Geometrics. Brady P. Brown, *Krispin Technologies, Inc.*; and Brian M. Argrow, *University of Colorado* (**36**, 10, p. 1842) Article based on AIAA Paper 97-1881

J98-279 Axisymmetric Breakdown of a Q-Vortex in a Pipe. Z. Rusak, C. H. Whiting, and S. Wang, *Rensselaer Polytechnic Institute* (**36**, 10, p. 1848) Article based on AIAA Paper 97-0441

J98-280 Development of a Nearly Omnidirectional Velocity Measurement Pressure Probe. Othon K. Rediniotis and Robert E. Kinser, *Texas A&M University* (**36**, 10, p. 1854) Article

J98-281 Updating Large Finite Element Models in Structural Dynamics. Peter W. Möller and Olof Friberg, *Chalmers University of Technology, Sweden* (**36**, 10, p. 1861) Article

J98-282 Differential Quadrature Approach for Delamination Buckling Analysis of Composites with Shear Deformation. Shapour Moradi and Farid Taheri, *Dalhousie University, Canada* (**36**, 10, p. 1869) Article

J98-283 Layerwise Theory for Dynamic Buckling and Postbuckling of Laminated Composite Cylindrical Shells. M. R. Eslami, M. Shariyet, and M. Shakeri, *Amirkabir University of Technology, Iran* (**36**, 10, p. 1874) Article

J98-284 Edge Effects in Laminated Composites with Pin-Loaded Holes. Chao Zhang, Suong V. Hoa, and R. Ganesan, *Concordia University, Canada* (**36**, 10, p. 1883) Article

J98-285 Comparing Model Update Error Residuals and Effects on Model Predictive Accuracy. Keith K. Denoyer, *U.S. Air Force Research Laboratory*; and Lee D. Peterson, *University of Colorado* (**36**, 10, p. 1894) Article

J98-286 Modeling Ascent Configurations of Strained High-Altitude Balloons. Frank Baginski, *George Washington University*; and Kenneth A. Brakke, *Susquehanna University* (**36**, 10, p. 1901) Article

J98-287 New Adaptive Move-Limit Management Strategy for Approximate Optimization, Part 1. B. A. Wujek, *Engineous Software, Inc.*; and J. E. Renaud, *University of Notre Dame* (**36**, 10, p. 1911) Article based on AIAA Paper 98-1965 CP9803

J98-288 New Adaptive Move-Limit Management Strategy for Approximate Optimization, Part 2. B. A. Wujek, *Engineous Software, Inc.*; and J. E. Renaud, *University of Notre Dame* (**36**, 10, p. 1922) Article based on AIAA Paper 98-1966 CP9803

J98-289 Duty-Cycle Effects on Penetration of Fully Modulated, Turbulent Jets in Crossflow. J. C. Hermanson and H. Johari, *Worcester Polytechnic Institute*; and A. Wahba, *New York Institute of Technology* (**36**, 10, p. 1935) Technical Note

J98-290 Slew Maneuver of Flexible Space Structures Using Time Finite Element Analysis. Jinyoung Suk and Youdan Kim, *Seoul National University, Korea* (**36**, 10, p. 1938) Technical Note

J98-291 Diffusion Flame Stabilized on a Porous Plate in a Parallel Airstream. Tri Agung Rohmat, Hiroyuki Katoh, Tetsuro Obara, Teruo Yoshihashi, and Shigeharu Ohyagi, *Saitama University, Japan* (**36**, 11, p. 1945) Article

J98-292 Quantitative Evaluation of Flow Computations by Rainbow Schlieren Deflectometry. Anil K. Shenoy, Ajay K. Agrawal, and Subramanyam R. Gollahalli, *University of Oklahoma* (**36**, 11, p. 1953) Article

J98-293 Control of Flow-Induced Noise Behind a Circular

Cylinder Using Splitter Plates. Donghyun You, Haecheon Choi, Myung-Ryul Choi, and Shin-Hyoung Kang, *Seoul National University, Korea* (**36**, 11, p. 1961) Article

J98-294 Screech Tone Noise and Mode Switching in Supersonic Swirling Jets. Young-Kil Yu, Ruey-Hung Chen, and Larry Chew, *University of Central Florida* (**36**, 11, p. 1968) Article

J98-295 Tetrahedral Unstructured Navier–Stokes Method for Turbulent Flows. Neal T. Frink, *NASA Langley Research Center* (**36**, 11, p. 1975) Article based on AIAA Paper 96-0292

J98-296 Large-Eddy Simulation of a Spatially Evolving Supersonic Turbulent Boundary-Layer Flow. Evangelos T. Spyropoulos and Gregory A. Blaisdell, *Purdue University* (**36**, 11, p. 1983) Article based on AIAA Paper 97-0429

J98-297 Efficient Newton–Krylov Solver for Aerodynamic Computations. Alberto Pueyo and David W. Zingg, *University of Toronto, Canada* (**36**, 11, p. 1991) Article based on AIAA Paper 97-0877

J98-298 Improved Treatment of External Boundary Conditions for Three-Dimensional Flow Computations. Semyon V. Tsynkov and Veer N. Vatsa, *NASA Langley Research Center* (**36**, 11, p. 1998) Article based on AIAA Paper 97-2074 CP979

J98-299 Effficient Approach for Analysis of Unsteady Viscous Flows in Turbomachines. L. He and W. Ning, *University of Durham, England, UK* (**36**, 11, p. 2005) Article

J98-300 Parallel Processing Scheme for the Navier–Stokes Equations, Part 1: Scheme Development. N. Ghizawi and S. Abdallah, *University of Cincinnati* (**36**, 11, p. 2013) Article

J98-301 Parallel Processing Scheme for the Navier–Stokes Equations, Part 2: Parallel Implementation. N. Ghizawi and S. Abdallah, *University of Cincinnati* (**36**, 11, p. 2020) Article

J98-302 Mixing Enhancement in High-Speed Turbulent Shear Layers Using Excited Coherent Modes. K. Lee and J. T. C. Liu, *Brown University* (**36**, 11, p. 2027) Article based on AIAA Paper 96-0547

J98-303 Effect of Time-Varying Wake Flow Characteristics Behind Flat Plates. Jean-Michel Desse, *ONERA, France* (**36**, 11, p. 2036) Article

J98-304 Simulation of Dynamic Methane Jet Diffusion Flames Using Finite Rate Chemistry Models. Viswanath R. Katta, *Innovative Scientific Solutions, Inc.*; and W. M. Roquemore, *U.S. Air Force Research Laboratory* (**36**, 11, p. 2044) Article based on AIAA Paper 97-0904

J98-305 Computational Investigation of Shock-Enhanced Mixing: Application to Circular Cross Section Combustor. Sang-Hyeon Lee, *University of Ulsan, Korea*; and In-Seuck Jeung and Youngbin Yoon, *Seoul National University, Korea* (**36**, 11, p. 2055) Article based on AIAA Paper 96-0730

J98-306 Unsteady Crossflow Separation Location Measurements on a Maneuvering 6:1 Prolate Spheroid. Todd G. Wetzel and Roger L. Simpson, *Virginia Polytechnic Institute and State University* (**36**, 11, p. 2063) Article

J98-307 Compressor Cascade Flow with Strong Shock-Wave/Boundary-Layer Interaction. B. Küsters and H. A. Schreiber, *German Aerospace Center* (**36**, 11, p. 2072) Article based on AIAA Paper 97-2882

J98-308 Numerical Analysis of Shock Wave Reflection Transition in Steady Flows. M. S. Ivanov, G. N. Markelov, A. N. Kudryavtsev, and S. F. Gimelshein, *Institute of Theoretical and Applied Mechanics, Russia* (**36**, 11, p. 2079) Article based on AIAA Paper 97-2511

J98-309 Proportional Control of Asymmetric Forebody Vortices. John E. Bernhardt and David R. Williams, *Illinois Institute of Technology* (**36**, 11, p. 2087) Article

J98-310 Air Data Sensing from Surface Pressure Measurements Using a Neural Network Method. Thomas J. Rohloff, *University of California, Los Angeles*; Stephen A. Whitmore, *NASA Dryden Flight Research Facility*; and Ivan Catton, *University of California, Los Angeles* (**36**, 11, p. 2094) Article

J98-311 Uncertainty Estimates for Temperature-Sensitive Paint Measurements with Charge-Coupled Device Cameras. L. N. Cattafesta III and T. Liu, *High Technology Corporation*; and J. P. Sullivan, *Purdue University* (**36**, 11, p. 2102) Article based on AIAA Paper 95-2193

J98-312 Optimal Location and Gains of Feedback Controllers at Discrete Locations. Makola M. Abdullah, *Florida A&M University* (**36**, 11, p. 2109) Article

J98-313 Frequency-Domain Karhunen–Loeve Method and Its Application to Linear Dynamic Systems. Taehyoun Kim, *Boeing Commercial Airplane Group* (**36**, 11, p. 2117) Article

J98-314 Bearing Failure in Pin Contact of Composite Laminates. P. S. Wu and C. T. Sun, *Purdue University* (**36**, 11, p. 2124) Article based on AIAA Paper 97-1119

J98-315 Forward and Inverse Analysis for Impact on Sandwich Panels. Cheng-Zorn Tsai, Enboa Wu, and Bin-Horn Luo, *National Taiwan University* (**36**, 11, p. 2130) Article

J98-316 Structural Damage Identification: A Probabilistic Approach. Loukas Papadopoulos and Ephrahim Garcia, *Vanderbilt University* (**36**, 11, p. 2137) Article

J98-317 Optimized Upwind Dispersion-Relation-Preserving Finite Difference Scheme for Computational Aeroacoustics. M. Zhuang and R. F. Chen, *Michigan State University* (**36**, 11, p. 2146) Technical Note

J98-318 Finite Element and Dynamic Stiffness Methods Compared for Modal Analysis of Composite Wings. Mark Lillico and Richard Butler, *University of Bath, England, UK* (**36**, 11, p. 2148) Technical Note

J98-319 Interaction of Sound from Supersonic Jets with Nearby Structures. C. C. Fenno Jr., *NASA Langley Research Center*; A. Bayliss, *Northwestern University*; and L. Maestrello, *NASA Langley Research Center* (**36**, 12, p. 2153) Article based on AIAA Paper 97-0283

J98-320 Inviscid Rotordynamic Damping Forces Due to Non-axisymmetric Tip Clearance in Turbines. Seung Jin Song, *Inha University, Korea* (**36**, 12, p. 2163) Article

J98-321 Application of Large-Eddy Simulations and Kirchhoff Method to Jet Noise Prediction. L. Gamet and J. L. Estivalezes, *ONERA, France* (**36**, 12, p. 2170) Article

J98-322 Computational Fluid Dynamics/Computational Structural Dynamics Interaction Methodology for Aircraft Wings. Manoj K. Bhardwaj and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University*; Eric Reichenbach, *The Boeing Company*; and Guru P. Guruswamy, *NASA Ames Research Center* (**36**, 12, p. 2179) Article

J98-323 Adaptive Finite Element Solution of Compressible Turbulent Flows. F. Ilinca, *National Research Council, Canada*; and D. Pelletier and L. Ignat, *École Polytechnique de Montréal, Canada* (**36**, 12, p. 2187) Article based on AIAA Paper 98-0229

J98-324 Direct Measurement of Delta-Wing Vortex Circulation. H. Johari and J. Moreira, *Worcester Polytechnic Institute* (**36**, 12, p. 2195) Article based on AIAA Paper 97-0743

J98-325 Optimal Control of Laminated Plate with Piezoelectric Sensor and Actuator Layers. M. C. Ray, *Catholic University of America* (**36**, 12, p. 2204) Article

J98-326 Development of a Coupled Approach for Structural Damage Detection with Incomplete Measurements. G. James, D. Zimmerman, and T. Cao, *University of Houston* (**36**, 12, p. 2209) Article based on AIAA Paper 97-0362

J98-327 Modal Expansion of Structural Systems with Time Delays. B. Yang and X. Wu, *University of Southern California* (**36**, 12, p. 2218) Article

J98-328 Vibration of a Mistuned Bladed-Disk Assembly Using Structurally Damped Beams. Jeffrey S. Turcotte, *Air Force Institute of Technology*; and Joseph J. Hollkamp and Robert W. Gordon, *U.S. Air Force Research Laboratory* (**36**, 12, p. 2225) Article

J98-329 Thermal Model for Cracked Structures Repaired with Composite Patches. G. Renaud and J. S. Hansen, *University of Toronto, Canada* (**36**, 12, p. 2229) Article

J98-330 Buckling of Thin Sheet of Delaminated Plates with Repair Fasteners. Chien-Chang Lin and Shou-Hsiung Cheng, *National Chung-Hsing University, Taiwan, ROC* (**36**, 12, p. 2236) Article

J98-331 Construction of Response Surface Approximations for Design Optimization. Gerhard Venter and Raphael T. Haftka, *University of Florida*; and James H. Starnes Jr., *NASA Langley Research Center* (**36**, 12, p. 2242) Article based on AIAA Paper 96-4040 CPCP9611

J98-332 Reduced-Dimensionality Geometric Approach to Fault Identification in Stochastic Structural Systems. M. H. Sadeghi, *University of Tabriz, Iran*; and S. D. Fassois, *University of Patras, Greece* (**36**, 12, p. 2250) Article

J98-333 Direct Computation of Lower-Bound Dynamic Buckling Loads of Imperfection-Sensitive Systems. Baisheng Wu, *Jilin University of Technology, PRC* (**36**, 12, p. 2257) Article

J98-334 Vibration Characteristics for Piezoelectric Cylinders Using Amplitude-Fluctuation Electronic Speckle Pattern Interferometry. Chi-Hung Huang and Chien-Ching Ma, *National Taiwan University* (**36**, 12, p. 2262) Article

J98-335 Effective Two-Point Function Approximation for Design Optimization. Suqiang Xu and Ramana V. Grandhi, *Wright State University* (**36**, 12, p. 2269) Article

J98-336 Small-Scale Vortical Structures in Crossflow Plane of a Rolling Delta Wing. K. M. Cipolla and D. Rockwell, *Lehigh University* (**36**, 12, p. 2276) Technical Note

Books Reviewed During 1998

Advances in Numerical Heat Transfer, edited by W. J. Minkowycz and E. M. Sparrow, *Taylor & Francis* (36, 1, p. 119); reviewed by A. J. Baker.

Computational Fluid Dynamics with Moving Boundaries, by W. Shyy, H. S. Udaykumar, M. M. Rao, and R. W. Smith, *Taylor & Francis* (36, 2, p. 303); reviewed by Douglas B. Kothe.

Turbulence, Coherent Structures, Dynamical Systems and symmetry, by P. Holmes, J. L. Lumley, G. Berkooz, *Cambridge University Press* (36, 3, p. 496); reviewed by S. Balachandar.

Computational Fluid Dynamics and Heat Transfer, Second Edition, by J. C. Tannehill, D. A. Anderson, and R. H. Pletcher, *Taylor & Francis* (36, 4, p. 664); reviewed by J. S. Shang.

Turbulent Shear Layers in Supersonic Flow, by Alexander J. Smits and Jean-Paul Dussauge, *American Institute of Physics* (36, 5, p. 879); reviewed by Joseph A. Schetz.

Introduction to Vortex Theory, by Hans J. Lugt, *Vortex Flow Press* (36, 6, p. 1120); reviewed by Stanley A. Berger.

Niedriggeschwindigkeitsprofile, by Dieter Althaus, *Verlag Vieweg* (36, 7, p. 1335); reviewed by Robert H. Liebeck.

Three-Dimensional Velocity and Vorticity Measuring and Image Analysis Techniques, edited by T. Dracos, *Kluwer Academic Publishers* (36, 7, p. 1335); reviewed by Zi-Chao Liu.

Self-Sustaining Mechanisms of Wall Turbulence, by R. L. Panton, *Computational Mechanics, Inc.* (36, 8, p. 1549); reviewed by Promode R. Bandyopadhyay.

Turbulence in Fluids—Third Revised and Enlarged Edition, by Marcel Lesier, *Kluwer Academic Publishers* (36, 9, p. 1768); reviewed by John L. Lumley.

Near-Earth Objects: The United Nations International Conference, edited by John L. Remo, *Anals of the New York Academy of Sciences,* (36, 10, p. 1943); reviewed by George Friedman.

Explorations in Quantum Computing, by Colin P. Williams and Scott H. Clearwater, *Springer–Verlag* (36, 11, p. 2152); reviewed by Philip Roe.

Fundamentals of Turbulence Modeling, by Ching-Jen Chen and Shenq-Yuh Jaw, *Taylor & Francis* (36, 12, p. 2279); reviewed by Fotis Sotiropoulos.
